Installation Instructions

Step 1. Carefully unpack fixture and all components.

Step 2. Disconnect power at main electrical panel before installation.

Step 3. Connect the fixture ground wire to the supply circuit ground wire using a wire nut(3 PCS).

Connect supply circuit ground wire to the mounting plate with GREEN hex-head ground screw.

Step 4. Twist the stripped fixture wire ends and supply circuit wires together:

black to black(hot), and white to white(neutral). Twist on the wire nuts, ensuring that the conductors are no longer exposed.

Step 5. Carefully tuck the connected wires and the wire nuts into the J- box.

Step 6. Install the fixture to the ceiling by locking Ball Nut(2 pcs)to the J-Box as drawing shows .

Step7. Install the opal glass shade to the canopy With Allen Head Screw(3 pcs) as drawing shows .

Warning:

Do not touch bulb when the fixture is turned on,

Turn off fixture and allow to cold before replacing lamp.

You should use a qualified electrician to install this fixture.
