# INSTALLATION INSTRUCTIONS

## Trenton

1. Carefully remove packaging from the fixture. Identify the fire plate, faux linen, metal with bronze panels, frame, and place on a non-scratchable surface.
2. All High voltage have a licensed electrician power off the circuit from the main breaker and prep the wire from the fixture and the J Box.
3. Mount the fire plate to the ceiling using the ½-13" nut to the ½-13" all thread provided by others. Before mounting the frame make electrical connections from the j box to the frame.
4. **Detail A:** Once frame has the correct connections, begin to secure the main frame to the fire plate using the 8-32" screws provided by Vault.
5. **Detail B:** Install the E-26 bulbs ( E-26 bulbs not included ), power on the circuit and begin to inspect the bulbs for full function.
6. **Detail C:** Once the test passes, install the Faux linen acrylic to the frame using the 8-32" finial provided.
7. **Detail D:** Install the frame with bronze acrylic panels using the 8-32" screws provided.
