lock and the other end into the wall charger

7. Indicator Light

1. Charging: Light always on.
2. Fully Charged: Light off.
3. Low Battery: Light flashes.

Indicator Light

8. Automatically Reconnect After Disconnection

If the distance between the paired Go Tag and the iOS device exceeds the Bluetooth connection distance (which is 50m in a closed barrier-free space), clicking "Play Sound" in the Find My app will prompt that the connection cannot be made. However, if Go Tag and the iOS device are within Bluetooth connection distance, clicking "Play Sound" in the Find My app will make Go Tag emit consecutive sounds, enabling you to easily find the items by following the sound.

9. Find items with help from millions of friends

The Apple Find My network provides an easy, secure way to locate compatible personal items using the Find My app on your iPhone, iPad, Mac, or the Find Items app on Apple Watch.
 Simply pair your compatible product with the Apple Find My app to view it right alongside your Apple devices. If your item ever goes missing, you can put it in Lost Mode to display a message and contact information to anyone who might find it. The Find My network is encrypted and anonymous, so no one else, not even Apple or the maker of your personal item, can view its location.

10. Lost Mode - Find things easier

Go Tag can be put into Lost Mode. You will automatically receive a notification when it's detected by other devices in the Find My network. To activate Lost Mode, open the Find My app and follow the onscreen instructions, where you can add your phone number or email account. This way, if someone else picks up your Go Tag, they can easily contact you by following the instructions in Find My.

11. Prevent unwanted tracking

To prevent unwanted tracking, if someone else's finding device is detected traveling with you for a period of time, your Apple device will find it and send you an alert notification. If you haven't found this device after a while, it will play a sound to help you locate it. However, if someone next to you has a finding device and it's near its owner, you will not receive a notification.

12. Privacy protection

Only you can see where your Go Tag is located. No location data or location history is physically stored inside the Go Tag. Communication with the Find My network is end-to-end encrypted, ensuring that only the device owner has access to its location data, and no one, including Apple and LeTouch, knows the identity or location of any device that helped find it.

13. Enabling "Notify When Left Behind"

Open Find My app and select the "Items" tab or open the Find Items app on your Apple Watch.
Tap on your Go Tag from the list.
Under "Notifications" enable the "Notify When Left Behind" toggle.
You will receive a notification when you leave your Go Tag behind and it's no longer in range of your device.

14. Enabling "Notify When Found"

Under "Notifications" enable the "Notify When Found" toggle.
When your Go Tag is seen by another Find My network device, you will receive a notification of its location.
Note :" Notify When Found" can only be activated when your Go Tag is out of range.

15. Remove the Go Tag from Find My App

Open Find My app and select the "Items" tab.
Tap on your Go Tag from the list.
please ensure "Lost Mode" is disabled.
Scroll to the bottom of the screen and tap "Remove Item".
A summary will open, tap "Remove" to confirm.

16. Turn Off and Factory Reset Your Go Tag

1.Short press the power button twice, then long press it for the third time until you hear two beeps to power off.

2.For reset, first remove the Go Tag from Find My app,then short press the button four times, and long press on the fifth time. If you hear a sound, the reset is successful. Go Tag is now reset and can be paired with your new Apple ID.
