

The background of the image is a dark, industrial scene. It features a large, circular grinding wheel in the upper left quadrant, which is in motion, as evidenced by a blurred, glowing orange and white trail of sparks extending from its contact point towards the right. The overall lighting is dim, with the primary light source being the sparks, creating a dramatic, high-contrast effect. The scene suggests a manufacturing or metalworking environment.

A NOX[®]

STAINLESS

PRESTIGE

A close-up photograph of a metal component. The top part shows a large circular hole in a dark metal plate. Below this, a vertical rod or shaft passes through the hole. The bottom part of the image shows a perforated metal surface with several circular holes. The background is dark and out of focus.

A URFIC® desenvolveu um novo material, tecnologicamente mais avançado, que permite produzir artigos de melhor qualidade e a preços competitivos, cuja resistência é superior a todos os outros materiais.

1. O acabamento de superfície **A♦NOX®** não risca e permite uma protecção com mais de 20 microns, dando uma garantia de superfície totalmente inalterável, mesmo quando aplicado em zonas marítimas, com uma duração mínima entre 30 e 50 anos.
2. O contacto com as mãos no **A♦NOX®** é "quente", por apresentar uma superfície aveludada, muito macia e uniforme, onde se sente o prazer de tocar. Não mancha, mesmo quando aplicado em zonas húmidas.

URFIC® ha desarrollado un nuevo material, tecnologicamente más avanzado, que permite producir artículos de mejor calidad y a precios competitivos, y cuya existencia es superior a todos los demás materiales.

1. El acabado de superficie **A♦NOX®** no marca y ofrece una protección de más de 20 micras, con una garantía de superficie totalmente inalterable, incluso si se aplica en zonas marítimas, y con una duración mínima entre 30 y 50 años.
2. El contacto con las manos en **A♦NOX®** es "caliente", ya que presenta una superficie aterciopelada, suave e uniforme, y cuyo tocar es un placer. No mancha, incluso siendo aplicado en zonas húmedas.

URFIC® a mis au point un nouveaux matériau, technologiquement plus performant, qui permet de fabriquer des articles de meilleure qualité et à des prix compétitifs, dont la résistance est supérieur aux autres matériaux.

1. La finition de surface **A♦NOX®** évite les rayures grâce a une protection de plus de 20 microns, garantissant ainsi une surface totalement inaltérable, même en cas d'utilisation dans des zones maritimes, et une longévité minimale de 30 a 50 ans.
2. **A♦NOX®** dans la main, le contact est chaud, grâce à une surface qui évoque le velours, très douce et uniforme, procurant un réel plaisir au toucher. Cet alliage ne tache pas, même en cas d'utilisation dans des zones humides.

URFIC® have developed a new more advanced technological material. This new material makes it possible to produce items to a higher quality with the added benefit of being able to offer competitive prices.

1. This new A♦NOX® velvet uniform finish is applied to the surface making it warm and smooth to the touch and a pleasure to handle.
2. A♦NOX® as well as looking good it is totally durable with a protection of more than 20 microns. It will not stain or scratch and will keep its excellent finish even in damp and extreme environments such marine and sea areas for a minimum of 30 years and up to 50 years.

URFIC® heeft een nieuw, technologisch zeer geavanceerd productiemateriaal ontwikkeld. Dit nieuwe productiemateriaal maakt het mogelijk om onze producten met een nog hogere kwaliteit dan ooit te produceren, tegen zeer concurrerende prijzen.

1. Neemt u een product uit dit geheel nieuwe A♦NOX® materiaal in de hand, dan voelt het prettig en "warm"aan. Het materiaal ziet er prachtig uit en is tevens bijzonder sterk en krast niet.
2. A♦NOX® ziet er niet alleen goed uit, het is ook bijzonder duurzaam. Met een bescherming van meer dan 20 microns kan het daarom niet krassen en is vlek vrij. Het behoudt zijn excellente finishing, zelfs in vochtige ruimtes en in ons kustgebied.
Wij garanderen onze producten uit A♦NOX® dan ook voor periode van minimaal 30 tot 50 jaar.

URFIC® hat ein neues technisch höher entwickeltes Material hergestellt, das die Produktion von Artikeln in optimaler Qualität zu einem konkurrenzfähigerem Preis ermöglicht. A♦NOX® verfügt über eine höhere Festigkeit als alle anderen bisher verwendeten Materialien.

1. A♦NOX® bietet nicht nur Vorteile im Design. Seine spezielle Oberflächenbeschichtung mit einer Tiefe von 20 Mikron gibt Sicherheit gegen Verkratzen. Dies garantiert eine unveränderliche Oberfläche, selbst bei Einsatz in Meeresnähe und in Regionen mit hoher Schadstoffbelastung der Luft (z. B. Industriezonen).
2. Durch seine samtige und gleichmässige Oberfläche vermittelt A♦NOX® beim Berühren ein angenehmes, weiches Griffgefühl. Das Material ist resistent gegen jegliche Art von Flecken. Selbst beim Einsatz in Feuchträumen und im Aussenbereich tritt bei der Oberfläche auch nach Jahrzehnten **garantiert keine Veränderung** auf.
