

You are a material scientist who has created their own mycelium composite!

You are taking it to a convention that showcases the newest types of sustainable materials. How will you advocate for your mycelium creation?

Challenge

## Roadmap

What does a material scientist do?

How does mycelium act as a resin to bind composite material?

Can mycelium hold up against water? Advocate for your mycelium product

What's a composite material, and why are they helpful?

Is mycelium a safe material to use?

Is mycelium sustainable?
