

5mm LEDs DC

Datasheet

5mm LEDs DC

20cm cable length, 20pcs

5mm LEDs DC

Specifications	3
Intended Use	3

Specifications

LED diameter	5mm
LED color	warm-white
Resistor value	470-560 Ohms
Cable length	20cm
Polarity and wire color	red=positive, black=negative
Operating Voltage	recommended 12V

Note: the resistor is already included in the wire.

Intended Use

This LED is intended for use inside buildings. The product is designed for installation with the enclosed brackets or for prototyping. The operating voltage is 12V.

The product is not suitable for installation in vehicles or mechanically loaded elements.

Operation outside the above provisions will void the manufacturer's warranty and liability.
