Company background and Designer Profile

Flora and Wilson

Wilson started Valtcan with Flora to bring EDC titanium products to the market. Wilson has a background in Electrical Engineering and Flora has a background in Business and finance. Their first design was a [Titanium toothpick holder and dispenser](#) which is still available. The idea was from Wilson's need for a toothpick after meals and the lack of any quality portable toothpick holders that fulfilled this need.

Today the world is a lot different than the days we grew up in - we played outside with neighbors everyday till sunset. Technology is only accelerating and distractions are fighting for everyone's attention and drowning out their own thoughts, missions and life path.

We believe nature can heal this and we just need to do nothing in its presence to reconnect with nature, God, our true self and inner peace. This connection, knowing and inner peace is just like what the poet Rumi once said... " No amount of searching will find this. A perfect falcon, for no reason, has landed on your shoulder, and become yours."

We design, market and bring products we find beneficial to our customers who feel the same way. Our customers expect quality in the material and functional design of their purchases and we promise to meet and exceed this ever increasing standard.

Valtcan Titanium Canteen with Mess kit in Mammoth Lakes California
