WHY BUY TRACKER ONE GPS TRACKERS?

Tracker One is a Genuine 3G GPS Tracker capable of operating on all current Australian Telcos/Carriers including Telstra, Optus, Vodafone and Affiliates. The vast majority of other trackers sold will only operate on Optus, Vodafone and their Affiliates, limiting their use in some country areas where only the Telstra Network is available.

DON'T BE CAUGHT OUT

Many trackers currently on the market are only 2G Compatible. 2G Frequencies have already been Shut down by Telstra and Optus and by the end of 2017, 2G trackers will no longer be able to operate in Australia.

USES

Tracker One can be used in pretty much anything that has battery voltage of 12-36 volts Cars, Trucks, Buses, Heavy Machinery, Caravans, Motorcycles. With Tracker One's IP67 Water Proof Rating they can even be used in Boats, Yachts and Jet-skis making Tracker One, one of the most versatile products available on the market today.

PEACE OF MIND

Tracker One includes a 12 Month Australian Warranty and FREE Lifetime use of our Tracking Website and Mobile Applications with no ongoing Monthly or Annual fees.

EASE OF INSTALLATION

A Standard installation requires only 3 Wires, 12v Constant, Earth/Negative and Accessories, and typically takes approximately 30 minutes. These cables are readily available throughout most vehicles.

EASE OF USE

Tracker One is one of, if not, the easiest Tracker to set up and use. To assist customers to use the different functions of the Tracker, we include a "Quick Start Guide" and USB Drive with comprehensive instructions and individual "How To" Guides in plain English with images.

CUSTOMER SUPPORT

Tracker One provides 7 Day support via our email system and telephone support from 8am – 6pm (WST). Our Telephone Support is based in Perth and manned by Knowledgeable English Speaking staff.

ONGOING COSTS

Tracker One research confirms the primary motivation of customers is to locate their cars or other vehicles if stolen.

Customers can choose whichever Telco and Plan they prefer as Tracker One can use any Data / SMS enabled Sim Card from any Australian Carrier. Aldi Mobile 365 Day Plan typically uses \$20.00 per year to operate, this is cheaper than our competitor's monthly fees, however, we suggest customers research which plan and Telco would best suit their requirements.

FEATURES & BENEFITS

Tracker One features include: -

- **Geo Fence**

The ability to set a perimeter around the vehicle, which if breached, sends an alert to the owner by SMS.

- **Speed Alarm**

The ability to set a maximum speed, which if exceeded, sends an alert to the owner by SMS.

- **Low Power/Power Cut Alarm**

If the battery power is low or cut off, an alert is sent to the owner by SMS

- **The Ability to Add Multiple Units to The Same Account rather than having to log into a new account every time you want to view a different vehicle.**
- **The Ability to set the Power/Performance depending of the type of vehicle being tracked Eg. A Caravan which is only used 3 months a year would have a lower current draw set up to help stop the battery going flat when not in use whereas a Vehicle used most days would be set to the most accurate settings available.**
- **Accuracy to within 5 – 10 metres**

Route Recording

Not only does Tracker One show you exactly where your vehicles are, but even more importantly where they have been. Tracker One website integrates Vehicle Route Information automatically recorded to its onboard memory, (as seen in the image below) displaying where a vehicle has been, how long it was there, average speed and retains this and other information for a minimum of 3 Months or 2000 Waypoints giving businesses incredible power to reconcile job invoices by displaying how long a vehicle was at a job and how much time the customer was actually charged, this is vital information to make sure your employees are charging for REAL TIME and not discounting costly labour charges.

WEBSITE AND MOBILE APPLICATIONS

Having a Tracker without being able to view its location, is like having a phone without a phone number. We offer our customers FREE Lifetime use of our Tracking Website and both iOS and Android Applications so no matter what device you are using, we have you covered. Our software is full functioned but more importantly, EASY to use, you will see some images of our platforms below and on the following page.

The Mobile Application as seen above gives you the ability to zoom in or out, switch to Playback Mode, Turn Alarms on or off, check the device status but, most importantly Track Your Valuables/Vehicles.

Above you will see a Screen Shot of the Tracking Website.

Similar to the Mobile Application, a larger screen makes it easier to view multiple vehicles on the same page and also makes it much easier when setting up GEO Fences.

Another feature of the Tracking Website is that you can actually send the device SMS commands, if required, for free, yes for FREE, yet another way we minimize ongoing costs for you!
