

The **GO2 by Sure-Lok\*** is an adaptable O2 holder designed to safely and quickly transport medical oxygen for personal use in school busses, para-transit or ambulette/non-emergency medical vehicles.

- **GO2** prevents O2 cylinders from tipping, falling or becoming a projectile during a sudden stop or maneuver.
- **GO2** works with Series L Track for quick fleet-wide deployment and ideal vehicle and passenger placement.

#### SPECIFICATIONS:

- O2 Cylinder Holder meets up to date 2010 National School Transportation Specifications & Procedures, Support Equipment and Accessories, B.3 and IEP – IFSP Process, Guidelines, E.11

- O2 Cylinder Holder meets Ambulance Manufacturers Division AMD Standard 003, Oxygen Tank Retention System

O<sub>2</sub> ON THE Go

**SURE-L<sup>OK</sup>**

Ergonomic **tightening and release knob**

Includes two (2) anti-slip straps to hold O<sub>2</sub> cylinder in place

**Quick release** adjusts easily to secure O<sub>2</sub> cylinders from size M2 to E

Made of high grade anodized aluminium for durability and corrosion resistance

**Visual locking indicator** helps ensure O<sub>2</sub> cylinder is locked in place

Compact in size and weighing less than 5 lbs. for ease of transportation

Mounts easily to **existing L Track** on vehicle floor and can be moved from one vehicle to another without the use of tools

\*Patent Pending.
