

C.E. White PCR

Go quickly and safely.

Convenient, innovative fold up case opens up quickly to provide a five-point child restraint.

The C.E. White Portable Child Restraint Seat (PCR) from HSM Transportation Solutions

Designed for transporting young children, this innovative PCR provides the best of both worlds: a convenient fold up carrying and storage case when not in use, then it unfolds quickly and easily into a five-point restraint system that meets National Highway Transportation Safety Administration (NHTSA) regulations for children.

The C.E. White Portable Child Restraint.

Count on these innovative features.

Meets FMVSS 213 and all Head Start Standards

All belts and attachment straps fold conveniently inside the self-contained carrying case

Accommodates children 20– 90 lbs. and up to 57" height

Vertical shoulder slide height adjustments

Attaches quickly and easily to any school bus seat without requiring seat belt

Make life easier and safer: Go with the C.E. White PCR system from HSM Transportation Solutions

To install, simply place the carrying case on the seat, unfasten the Velcro lip and unfold the case to create a cushioned seat. A belt wraps around the school bus seat and attaches to the PCR, while the built-in five-point harness provides an adjustable restraint system for children from 20 to 90 pounds.

When not in use, the seat converts to a self-contained carrying case with an adjustable strap, that creates a handle or shoulder strap which makes it easy to carry, reducing wear and tear and increasing the useful life of the system.
