The LINE2design Firefighter Helmet and Turnout Gear Bag is made with the most advanced durable and synthetic fabric on the market. The infused Ripstop fabric has an outer shell that is water repellent, able to withstand above average water exposure. The specially designed inner fabric has an infused PVC coating that keeps water from getting into the bag while also preventing toxic gases from escaping. The PVC inner liner is durable and easy to wipe clean.

The main compartment features heavy duty zipper pulls and plenty of room for all your gear. The bag also features an all-impervious black bottom, which includes six protective feet for increased durability. The inside of the bag also has the black all impervious material to protect against normal use and provided an additional layer of being water resistant. The large, 8 1/2" wide, helmet compartment on one end of the bag is vented for air circulation. This bag also features a 2" wide end compartment, a zippered front pocket for small items, Maltese cross logo and reflective trim for added safety.
