PebbleGlue
Decorative stone adhesive.

Product Overview

PebbleGlue is an easy-to-use, water-based adhesive binder designed to securely hold decorative stones, bark, mulch, pebbles, and more in place, preventing them from shifting or becoming untidy in your landscaping projects.

TECHNICAL SPECIFICATION

Product Size	1ltr
Shelf Life	12 months in sealed containers
Coverage rates	See 'Coverage Guidance'
Intercoat Time	12 - 16 hours (temp dependent)
Full Cure	24 - 48 hours (temp dependent)
Application Temp	5°C - 25°C
Recommended Stone Size	For optimal performance, PebbleGlue is best used with stones ranging from 4mm to 10mm in size. It can also be applied to stones up to 15mm; however, when using it on larger stones, please note that they are not suitable for areas with foot traffic.
Appearance	Milky White Appearance

COVERAGE GUIDANCE

Please note that coverage may vary depending on the stone size and the application method used (higher saturation results in less coverage).

Application Method	Coverage
Mixing	1ltr = 40kg Stone
Spray & Pouring (Watering Can)	5ltr = 10m2
Spray (Pressure Pump)	5ltr = 14m2
Spray Bottle	1ltr = 2.8m2

FAQ'S

• Will PebbleGlue work on dirty stones?

Clean and dry stones before applying PebbleGlue for best results, as dirt can affect bonding.

• Is PebbleGlue safe for plants and pets?

Yes, PebbleGlue is a water-based solution safe for children, pets, and plants.

• How long does PebbleGlue take to set and cure?

Allow 24 hours for the first coat to dry before applying additional coats.

• Will PebbleGlue change the appearance of stones?

PebbleGlue dries clear, enhancing the natural look of stones without changing their colour.

• Can I water the area after applying PebbleGlue?

Yes, PebbleGlue allows water to filter through without blocking infiltration.

• Can I jet wash the stones after applying PebbleGlue?

We recommend avoiding jet washing and using a soft approach of a garden hose or warm water for cleaning.

• Does PebbleGlue work on bark, mulch, or slate chippings?

Yes, PebbleGlue works on a variety of materials, including pebbles, stone, bark, mulch, and slate chippings.

• Does PebbleGlue prevent weed growth?

For effective weed prevention, we always recommend using a root barrier membrane before applying PebbleGlue.
