

347*260mm

Piscifun Speed Line Spooler

Instruction

Easy to Install

Tips ▶ Top Screw: Tighten it to stabilize the rotor and loosen it to let the rotor spin.

Middle Knob: Adjust the middle knob according to the width of your line spool to get the proper tension.

Rotor: Holds the line spool.

Bushings(① & ②): Loading different diameter line spools.

How to use bushings?

Large bushing

Small bushing

Tips ▶ The two bushings are used for loading different diameter line spools.

How to use spinning reel?

Tighten the top screw.

Tie the line on the reel first.

Attach the reel to the handle.

Adjust the middle knob to make sure the rotor arms fit the line spool.

Loosen the top screw so the rotor can spin.

Start spooling the line to your reel.

How to use baitcasting reel?

Tighten the top screw.

Tie the line on the reel first.

Attach the reel to the handle.

Adjust the middle knob to make sure the rotor arms fit the line spool.

Adjust the rotor same as picture shows. Then tighten the top screw to stabilize the rotor.

Start spooling the line to your reel.

Tips ▶ You can also use it with trolling reel, round reel and spincast reel same as low profile baitcasting reel.
