

FUNCTION: long barrel 20A outlet
 MATERIALS: polycarbonate casing, electrical components
 CONFIGURATION: for use in all 22.2 alternate mounting plates
 INPUT / OUTPUT: 125V AC, 60Hz - 20A

DESCRIPTION

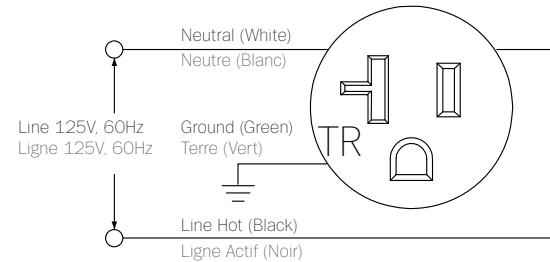

The 22 system is a complete suite of interior surface accessories that challenge the traditional, tired and ubiquitous cover plate concept. The 22 is designed to "mud" directly into drywall without a visible cover plate or trim. Alternatively, it may be set flush into millwork, marble, glass or any other surface. 22 operative components include: power outlets, data & communication, telephone receptacles, cable and HDMI connectors, line voltage on/off switches, keypad controls, and USB.

APPLICATIONS

The 22.3.8L is a type B outlet. It is compatible with plug types A & B. The 22.3.8L can be inserted into any of the 22.2 series alternate mounting plates. The suffix "L" refers to the extended barrel length for use with thick finish materials.

NOTES

- + Mounting plates sold separately
- + Purchase additional components at www.bocci.com/shop/22

Best practice statement: For ease of future access or maintenance, we recommend a single incoming wire to the junction box (no J-box splices) immediately behind the 22 receptacles.
