CES FLAVOURS QUALITY SUITE

The CES Flavours Quality Suite

This CES Flavours brochure showcases the extensive range of different finishes that CES Locking Systems can offer.

From a classic nutty brown finish to a highly polished brass, the Quality Suite range enables you to select an accurate match for your ironmongery and creates endless possibilities for your doorsets.

CES Secure Cylinder Locking Systems

The different CES flavours complement the CES key systems that are available. Naturally lending themselves to a commercial application, the CES cylinders have the benefit of patent protection for the SP and WO key systems and trademark protection for the KM and WM series.

The CES cylinders provide maximum security as well as convenience, being built from as many as 120 individual parts and manufactured with utmost precision.

Within each master key system CES can supply conventional euro profile cylinders, swiss profile, padlocks, interchangeable core cylinders and furniture locks, all on the same key section. Couple this with one of the thickest and most robust keys in the marketplace and you have a high quality system for your commercial door ironmongery.

Each cylinder is unique and has its individual registration number. Replacement or additional keys are only available from authorised dealers against presentation of the security card supplied with the cylinder.
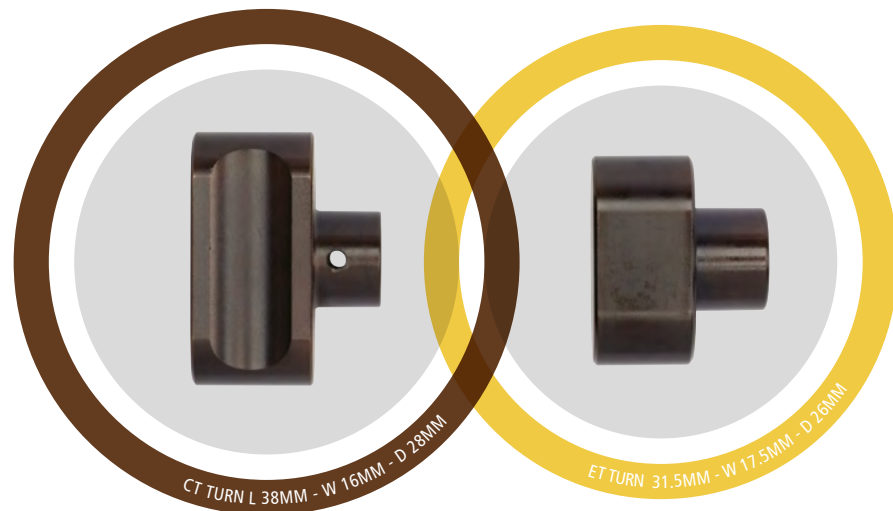

Partnered with a finish that will match the rest of your ironmongery, you can see why the CES Quality Suite offering is so tempting.
