STOPPINO

**Il modo più facile di
fermare la porta**

**The easiest way to
stop the door**

Stoppino Open

Stoppino Open è un fermaporte magnetico a pavimento estremamente minimalista sviluppato per porte da interno. Il suo utilizzo evita che la porta sbatta a causa di improvvisi colpi di vento o che possa urtare pareti o mobilio in prossimità di quest'ultima. Stoppino Open si compone di tre elementi: un corpo che viene inserito nel telaio della porta e una base con magnete per il pavimento. Stoppino Open è disponibile in due versioni: il modello 1 si caratterizza per una base dal limitato impatto visivo mentre il modello 2 ha una base con un design peculiare disponibile in diverse finiture. Entrambi le basi possono essere applicate a pavimento tramite biadesivo o con una vite e sono calpestabili. L'applicazione di Stoppino Open con biadesivo è ideale per ambienti con riscaldamento a pavimento o dove non è possibile effettuare fori. Il biadesivo è testato per resistere a situazioni con elevata umidità o temperatura.

Stoppino Open is a concealed magnetic door-stopper developed for interior doors. It prevents the door from opening too far and damaging nearby wall or furniture or slamming because of the wind. Stoppino Open has three main parts: the body to be fixed in the door inner frame and a base with a magnet for the floor. Stoppino Open is available in two versions: Model 1 has a small base for a low visual impact whereas model 2 has a specific design base available in different finishes. Both bases can be fixed to the floor with self-adhesive or with a screw and they are both walkable. The application of Stoppino Open with self-adhesive fixing is suitable for floor heating systems or where it is not possible to drill the floor. The self-adhesive is tested for environments with high humidity or temperature.

Stoppino Open è un sistema meccanico con applicazione magnetica di fermo per porte che permette di bloccare la porta in posizione di apertura.

Stoppino Close

Stoppino Close è un sistema di chiusura per porte senza l'utilizzo di tradizionali serrature. Grazie al sistema con due magneti è possibile tenere l'anta in posizione di chiusura in qualsiasi situazione. I magneti permettono inoltre di eliminare qualsiasi rumore avvicinando o allontanando l'anta. L'installazione è altrettanto semplice ed immediata grazie agli scodellini che permettono di mantenere in posizione corretta i magneti e agendo su una vite di regolarne l'attrazione. Stoppino Close scompare completamente alla vista quando la porta viene chiusa. Per una soluzione ancor più minimalista è possibile applicare i magneti all'estremità superiore della porta, ottenendo così una pulizia completa dello stipite e del profilo della porta, eliminando invasive serrature. Stoppino Close è utilizzabile su ante in legno e su cornici d'alluminio.

Stoppino Close is a closing system for doors without traditional locks. Thanks to a system with two magnets, it is possible to keep the door shut in any situation. Moreover, there is no noise when opening and closing the door. Installation is quick and easy since the housing cups provided set automatically magnets in the correct position and with a screw you can adjust their attraction force. Stoppino Close is completely concealed when the door is closed. Magnets can also be applied on the top of the door for an even more minimalistic solution so that the frame and the side of the door will be completely clean with no visible hardware. Stoppino Close can be applied on wooden and aluminium frame doors.
