things to love!

serafini products around the front door: especially for outdoor usage products need to offer functionality and durability, besides a great premium-quality design. It's the materials, their processing and combination that create an outstanding overall result.

Products, which are used outdoors, are exposed to strong weather conditions, which they have to withstand. Therefore serafini uses mostly stainless steel in V4A quality for its exterior products. Compared to regular stainless steel in V2A, this material offers a much better resistance against flash rust and selective leaching through a higher percentage of molybdenum and nickel.

The combination of technical perfection and a great sense for design enable the creation of products that are fun and inspiring.

Design by atelier 522

Many **serafini** products are designed by atelier 522, a team of creative minds who live and work next to Lake Constance and primarily love wind in their sails and under their wings. This has influenced their design, their architecture and their meaningful handling of everyday life. The sensuality of smelling, tasting, feeling, and not least of seeing and hearing drives atelier 522 to create increasingly sophisticated interpretations of life.

It is all about new combinations of the known and the familiar, which thereby gain an innovative perceptual quality. In this sense, atelier 522 designs products for serafini that bring together the contradictory nature of emotion and function.

LINE

PRESENTATION SYSTEMS

Designing and setting up show rooms and stores has become a complex task nowadays, where architecture, design and merchandising have to be brought together in a goal-oriented manner. For over 30 years **serafini** has developed tailor-made shop systems and office equipment, which allow a flexible presentation of goods. It is the company's aim to put different types of highly differentiated product groups into the spotlight – without any distraction. **serafini** presentation systems support the sales process and guide the customer through an attractive customer journey.

This includes the highest quality, best technology and an aesthetic approach that brings goods and customers together in order to create a unique shopping experience.

INTERNATIONALITY

CLIENT SOLUTIONS

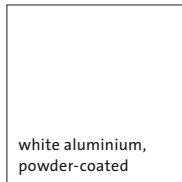

Constantly changing markets and demands require an ever more flexible project management. Managing, coordinating and controlling different projects efficiently at the same time is what counts today.

With **serafini**, you can benefit from the long-standing experience and expertise. Professional advice in every phase of your project – from concept through production of the first prototypes to mass production. Thanks to its ever-growing network **serafini** offers the possibility to carry out all individual operations for you that are necessary for the realization of your projects – without compromising your high demands. As a specialist for materials the manufacturer in Iserlohn is familiar with all materials and surfaces. Whether it's wood, metal, glass, acrylic, leather, plastic or concrete – **serafini** guarantees a design that suits the material and offers perfect workmanship.

General Terms and Conditions

All orders are subject to the general terms and conditions of Paul Serafini GmbH & Co KG.

Reservation

All information is subject to technical and formal changes. Load data and load capacities refer to a professionally set up and executed installation, in accordance with the manufacturer's requirements. The installation requires an appropriate load balancing.

Disclaimer

serafini systems and components are subject to safety checks of external supervision by the TUV Nord certification body. They require an orderly installation of the systems by trained professionals, as well as a balanced load distribution. The manufacturer is not liable for defects caused by inappropriate or improper use, incorrect installation / commissioning through the customer or third parties, normal wear and tear, or faulty or negligent treatment. The same applies to the consequences of improper modifications or modifications applied without the manufacturer's consent or maintenance by the customer or a third party.
