

FOSSIL HOOKS

M SCHNEID

D JULIA JESSEN AND LENA REETZ

Inspired by the preserved traces of the past, the consciously crafted Fossil wall hooks will brighten up your space while showcasing your most precious pieces.

Characterized by an asymmetrical organic shape the 5 distinct elements create the relation to the fossil and the natural, whereas the shiny and colorful glazes add a captivating contrast and pave the way to the boldly contemporary and inspiring energy that is what Schneid Studio is all about.

With their gentle playful expression, the wall hooks are not only a functional display for your dearest belongings but are also artwork themselves, a little pop of color for your home, an inspiring sculpture standing out from everyday objects.
