

UPPM Series of Urinalysis Privacy Pass-Throughs

Attractive and discreet wall-mounted design

Stores multiple sample cups per drawer, and features an additional storage rack between the two drawers

- Made in the USA out of sturdy, durable and easy-to-clean stainless steel
- Standard and custom sizes available

Chaparral'sTM UPPM line of Urinalysis Privacy Pass-Through Drawers offer a unique and innovative solution to the handling of urinalysis cups that help health organizations comply with HIPAA regulations and increase nurse efficiency. The UPPM Series feature sliding drawers that contain multiple urinalysis cups, eliminating the need for nurses to remove and handle the cups after each sample is taken. The drawers utilize one-way hinge mechanisms, increasing compliance with HIPAA regulations by reducing the risk of patients viewing other patients' sample cups. The UPPM line of drawers is the only product of its kind in the marketplace, and is truly revolutionary in its design. Below are just a few features of Chaparral'sTM Urinalysis Privacy Pass-Through Drawers:

- Help health care organizations comply with HIPAA regulations and increase patient privacy by reducing the chance of viewing other patients' sample cups
- Help increase nurse efficiency by eliminating the need to remove / handle urinalysis cups after each sample is taken
- One-way hinge mechanism instantly hides samples from patients' view and stores them until a healthcare professional is ready to collect them
- Attractive and compact wall-mounted design
