CHARRED WHISKEY STAVE FLOORING

Uniquely Satisfying

Another of our stunning materials available exclusively from the Antique Barrel Collection by The Vintage Wood Floor Company. The floor is produced from the charred oak interior of retired whiskey/bourbon barrels.

We are always pushing the boundaries on what is possible with unique applications of raw materials. We have made a name for ourselves in a business where competitors come and go. We painstakingly hand make every floor ourselves. This labor intensive process is costly but the resulting products speak for themselves--and get people talking!

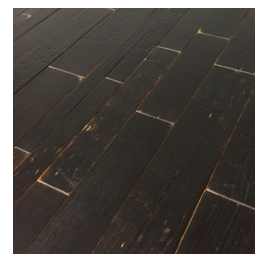

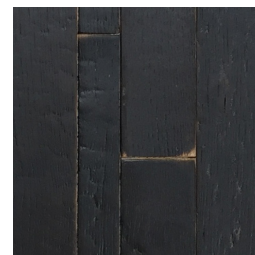

Don't think that because we call this a floor that it can't be used for other purposes. In fact, we use this material ourselves to create eye catching counter and table tops, shelving, wall and ceiling paneling, and backsplashes. The uses are truly endless.

Our floors help you tell a story and bring history home. No where else can you get a floor with such a story to tell. Retired whiskey and bourbon barrels given a new life and saved from the scrap pile.

Other materials available: Coopersmark Whiskey Barrel, Coopersmark Wine Barrel, Wine Soaked Wine Barrel
