SERVICING OF DOUBLE-INSULATED APPLIANCES

In a double-insulated appliance, two systems of insulation are provided instead of grounding. No grounding means is provided on a double-insulated appliance, nor should a means for grounding be added to the appliance. Servicing a double-insulated appliance requires extreme care and knowledge of the system, and should only be done by qualified service personnel. Replacement parts for a double-insulated appliance must be identical to the parts they replace. A double-insulated appliance is marked with the words “DOUBLE INSULATION” or “DOUBLE INSULATED”. The symbol (square within a square) may also be marked on the appliance.

This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety measure.

For safety, turn the ON/OFF switch off and unplug after and when not in use.

For safety, turn the ON/OFF switch off and unplug after use.
The red indicator light indicates the InStyler® IONIC STYLER is turned on for either Low or High. The blinking indicator light indicates the temperature has not reached the set temperature.
Before using any of the styling techniques shown on the following pages, begin with these basic directions to get started:

1. Divide the hair into sections and brush through with the tool again. Roll each area as you would with a round brush and blow dryer to create maximum fullness, body, and volume. Do not let the hair roll around the brush, you need to roll the brush through the hair.

2. Use a steady speed when brushing with the tool to ensure easier styling without tangling. It is important not to pull the hair too tightly around the barrel, especially when the unit is in a horizontal position.

3. Since the heat is inside of the brush barrel, it is important to use your free hand to cup the hair and hold it as close to the barrel as possible as you roll it through the hair without letting the hair become tangled.

4. While getting used to the new technology, start with small sections until you become more comfortable with the tool.

### Curling

Start brushing hair from underneath slowly, then rotate the InStyler IONIC STYLER once to roll the hair ends.

Make sure not to roll the hair up around the barrel, the technique is more like spin, then brush, then spin, then brush as you move the IONIC STYLER through your hair to the ends.

**TIP:** Take a section and start rolling hair in the mid area. Then slide the brush towards the end slowly to create rounded body and volume.

### Max Volume

Apply the InStyler® IONIC STYLER at the roots of the top section where additional volume is desired.

Make sure the roots are snug against the barrel, but don’t wrap your hair around the entire barrel. Leave the barrel in place for a few seconds, more if you have thicker hair, and then slowly glide the styler up through your hair. At the ends, curl your hair around the barrel and slowly spin it through the hair, again being mindful not to wrap the hair around the styler. Use your free hand to cup the hair and hold it in place against the barrel. After a few seconds drop the hair out of the barrel for a beautiful finish and amazing volume.

**TIP:** For extra hold, use hair styling products such as gel or cream to each section before using InStyler® IONIC STYLER.
Straightening

The key to straightening is tension. Brush through your hair a few times to make sure it’s tangle free and to allow the ions to start to hydrate the hair and remove the frizz.

Start with smaller sections as you become more familiar with the technique. Hold the ends of your hair and place the IONIC STYLER snuggly against the root.

Make certain that you are putting as much tension as possible so that the hair is pressed as firmly to the heated barrel as possible. Glide the IONIC STYLER from roots to ends, making sure to keep as much tension as you can. The bristles will automatically separate the hair to distribute the heat evenly and ensure a polished and smooth result.

**TIP:** Depending upon your hair type, experiment with heat settings and speed for optimal results.

Styling Bangs

**Add Volume and Movement to Bangs:**
Slide the InStyler® IONIC STYLER from underneath or on top of your bangs and then slide toward the end slowly.

**Styling Side Bangs:**
Hold the InStyler® IONIC STYLER vertically, and roll and brush hair towards the back of the head.

Short Hair

Place the styler snug against the scalp under a section in the front. Simply roll the InStyler® IONIC STYLER back along the scalp to add volume to short hair.

COOL TOUCH BRISTLES
Remember you can apply your hand to hold hair over the bristles to make styling easier.
What to do if your Hair Tangles

1. Turn the unit off.
2. Do not panic and pull or tug on the tool. That will only make the tangle worse.
3. Start by unrolling the tool in the opposite direction that caused the tangle.
4. If unrolling the tool the opposite way doesn’t fix the problem, use a comb to lift and pick out strands that are snug and tangled. This will create space and freedom for your hair to become unwrapped from the tool.
5. Do not attempt to pick the hair out with your fingers or nails between bristles. Use a comb edge, as the unit is hot.

Care

- Always unplug the InStyler® IONIC STYLER and let it cool down before cleaning.
- Do not rinse with water. It may damage the InStyler® IONIC STYLER.
- To clean the nylon bristles, wipe with a moistened cloth. Do not use products that include benzine and/or paint thinner for it may damage the InStyler® IONIC STYLER.
- To clean the ceramic barrel, use cotton swabs. Be cautious not to leave the cotton fibers in the barrel.
- Clean often to avoid collecting dust and hair.

Storage

Be sure to check the following before storing the IONIC STYLER:
- Turn the ON/OFF switch off, and unplug.
- Be sure the ceramic barrel has cooled off.
