

APRIL NEWSLETTER

Research has shown that developmental orthopedic diseases such as OCD, cervical vertebral malformations, angular deformities, contracted tendons and physitis can be caused by many factors such as genetic predisposition, management practices, diseases and dietary influences. Good nutrition may assist with these types of conditions.

Young horse protection, ideal for the growing horse. Contains nutrients needed for the normal growth and health of both the muscular and skeletal systems. It also has a role in the absorption of calcium and phosphorus, maintaining normal healthy vision, skin, reproductive performance and growth processes.

Due to the increased need of specific nutrients, vitamins and minerals in the growth & developmental phase each individual horse goes through in their younger years of life, we have formulated GrowthFix to ensure each horse is getting the optimal amount of nutrients to optimise their development. Ideal for the growing horse, especially suited to larger breeds. Extra Vitamin D added to aid in the absorption of calcium and phosphorus. Assists in maintaining healthy vision, skin condition, reproductive. Performance & growth processes

Hi Form BreedPlus offers essential support for weanlings, yearlings and broodmares. Includes an excellent level and balance of calcium and phosphorous. This plays a role in normal growth and maintenance of bones.
