Flood Support for Horses

From the whole team at Hi Form our thoughts go out to those who have been recently affected by the flash flooding. We understand this is a difficult time for everyone involved and if we can help in anyway we will.

Our phone lines are open if anyone needs nutritional assistance with horses who have developed rain scald, mud fever, foot problems or immune issues as a result, we are happy to help with advice and work alongside your veterinarian, where necessary.

Please be aware of mould growing in feed or contaminated water as this can cause more problems down the track. Below are some things to prioritize as well as look out for, if you would like to discuss a prevention plan, please give us a call and we will see what we can do.

- Prioritise roughage as hay, where available.
- Use slow feed hay nets to reduce wastage if you have access to them.
- Keep an eye out for mould affected feed
- Avoid contaminated water where possible

Keep a watch on your horses as development of the following may occur:

- rainscald
- mudfever
- foot problems
- pneumonia
- wounds (especially to the legs)
- waterborne illnesses such as leptospirosis
