PROFLAMAID PLUS & ARTHRITIS

SYMPTOMS OF ARTHRITIS / JOINT CONDITIONS

- Swollen joints
- Stiffness
- Uneven gait
- Lameness
- Heat
- Pain and tenderness
- Change in personality to being ridden
- Excess joint fluid

CAUSES OF ARTHRITIS / JOINT CONDITIONS

Arthritis will often occur changes in the regular structure and function. It can be triggered by injury through trauma where the bone or cartilage is damaged or the roughening of the smooth surfaces from infection. Causes can be from poor conformation, mineral deficiencies, poor feeding, repetitive stress or injury and imbalances in the body.

“

Prevention is key

—

TREATMENT OF ARTHRITIS

Prevention is always best, and this includes good diet, supplementation, and movement. Anti-inflammatories, pain relief and joint lubrication are key.

PRODUCT & DOSE RATE

ProflamAid Plus - Begin with 50g daily, reduce to 25g when improvement is noticeable. Can be increased as needed. Continue with this dosage until the horse has dramatically improved, usually a minimum of 4-6 weeks. Equigesic can be given when acute pain is present AlphaFlax Oil.

EQUIGESIC PLUS

EquiGestic Plus has the most amazing pain relief properties, allowing osteoarthritic cases to remain in work. Osteoarthritis is a very common condition and if managed, the life of the performance horse or happy hacker can be extended. Activity is the number 1 key to managing this condition, so it makes absolute sense to use a safe, well researched formula. EquiGestic Plus also has many other amazing attributes, such as its very strong antioxidant effect and exceptionally high absorption and utilisation rate, making this not only highly effective, but also fast acting.

EquiGestic Plus can be combined with ProflamaidPlus to provide maximum pain relief after an acute injuries or at times of increased discomfort of chronic injuries.
