

HACCP Infra Red Thermometer 8868

Description

Food Grade Infra Red Gun Style Thermometer with fold out Probe.

8868 HACCP model is waterproof making it ideal for restaurants, cafe's, take away food and product manufacturing. The thermometer features an infrared sensor and includes a probe in the one unit to show temperature in increments of 0.1°C.

Features inbuilt HACCP indicators that tell the operator if the food is within allowable food safety standards temperatures. If cool food is less than 5° C then you get a GREEN light and if it is not then you get a RED light. Simple. Works for Hot food as well and if the food is over 60° C then you get a light for the HOT storage temp.

Specification of HACCP Infra Red Thermometer 8868

Measurement Range:	-40 to +280°C (IR) -40 to +200°C (RTD Probe)
Sensor Type:	Infra Red/RTD
Accuracy (IR):	<0°C: +/- 1.0°C / -5-65°C : +/- 1.0°C / >65°C: +/-1.5% reading
Accuracy (RTD):	<-0.5°C: +/- 1.0°C / 0-65°C : +/- 0.5°C / >65°C: +/-1°C or 1.5% rdg
Resolution:	0.1°C
IR Repeatability:	+/-1°C
Emissivity:	0.97
D:S Ratio:	3:1
Display:	21 x 28 mm
Probe Length:	82mm
Battery:	9V
Dimensions:	61.5 x 35.5 x 167mm
Weight:	140g
