

Instructions for Angelus Press eBook Files

1. Downloading eBooks
2. eBooks for Kindle
3. eBooks for Nook, Kobo, Sony
4. eBooks for Apple

General Information:

Angelus Press eBooks are available in EPUB (.epub) format. This format can be read on your personal computer using one of several free applications. The Kindle desktop app is available for both PC and Mac. Adobe Digital Editions is also available for both PC and Mac. There are many options available for either PC or Mac, so choose which ever one is preferred.

Additionally, there are many ways to read eBook files on eReader devices. The process of transferring eBook files to your particular device is called "sideloading". Different devices and applications have different requirements for sideloading eBook files, and it is difficult to address all potential issues here. The information below is provided to help with the majority of eReader devices. This information is not exhaustive, and more options do exist. If you need further information, please refer to the User Manual that came with your device or one of the many online help forums available to address the unique eBook or eReader issue you may be experiencing.

1. Downloading Your Angelus Press eBooks

There are two ways to access and download your eBook files purchased from Angeluspress.org:

Order Confirmation Email

After you complete your order, you will receive an email at the address associated with your account (or indicated by you during checkout), confirming that your order was placed successfully. In this email, there will be a download link listed below your eBook title. The link to your download will allow you two opportunities to download the file. Click the link to download the eBook files. Be sure to note where your file is being saved. You will need this file to load onto your eBook device.

2. Reading Angelus Press eBooks on Your Kindle Device

Note: The following instructions are for Kindle device owners. If you use the free Kindle app on any other reading device (iPad, Smartphone, etc), you will only be able to read books purchased through the Amazon Kindle Store. If you do not own a Kindle, please look for your specific device below for instructions on sideloading and reading your Angelus Press eBook.

NOTE: MOBI (.mobi) eBook files are no longer able to be sideloaded.

1) Wireless Transfer

Your Kindle account comes with a dedicated Kindle email address, which can be found on the "Manage Your Kindle" page at Amazon.com. Download the epub eBook file to your computer, phone or tablet. Email the file to your dedicated Kindle email address, as an attachment. Amazon will wirelessly deliver the file to your Kindle device.

2) Using Your Kindle USB Cable

You may also use your Kindle's supplied USB cable to sideload the epub file onto your Kindle. You may find this to be faster than Kindle's Wireless Transfer option. When you connect your Kindle to your computer, your computer will treat it the same as an external USB "flash" drive. For Windows PC's, this could be "Windows Explorer", "My Computer" or "Computer", depending on your version of Windows. For Mac computers, this could be on your desktop or in the Finder app.

Sideloaded Your Kindle, Kindle Touch or Kindle Fire

- 1) Download your epub file from Angelus Press.
- 2) Connect your Kindle to your computer with the supplied USB cable. The Kindle should appear as an external USB drive. (On a Kindle Fire, you may need to unlock your screen by sliding the arrow).
- 3) Open your Kindle drive, then open the "documents" folder.
- 4) Move or Copy/Paste your file into your Kindle's "documents" folder.
- 5) Eject your Kindle drive, as you would a USB drive. (On a Kindle Fire, you may need to press the Disconnect button on your device).
- 6) Your eBook should now appear on your Kindle's "Home" screen.

3. Reading Angelus Press eBooks on your Nook, Kobo or Sony eReader

NOTE: Your computer may identify your EPUB download as a ZIP file. If so, do not try to open the .zip file. You need to change the extension first. You can change the extension by renaming the file and replacing the .zip with .epub.

The EPUB file format is the industry standard for eBooks and is the most widely-supported among different eReader devices, including Kindle.

Sideloaded Your Nook, Kobo or Sony eReader

- 1) Download your EPUB file from Angelus Press.
- 2) Download and Install Adobe Digital Editions to your computer.
- 3) Open Adobe Digital Editions.
- 4) Open your EPUB file in Adobe Digital Editions by clicking "Library", then "Add" and selecting your EPUB file.
- 5) Connect your eReader to your computer with the supplied USB cable. You should see your device appear as an icon in the Bookshelves column of the Adobe Digital Editions window.
- 6) Drag & Drop your eBook from the Library window to your device bookshelf. (If prompted to authorize the device, you should allow it.)
- 7) Eject your device, as you would a USB drive.
- 8) Your eBook should now be accessible to read on your eReader.

4. Reading Angelus Press eBooks on Apple devices

Note: You can open your eBook file on your Apple device by logging into your AngelusPress.com account using Safari, clicking "My Account", then "My Downloads". Here, you can locate your eBook file download link. Tap the link and Safari should give you the option to open your eBook in various applications. If the file is EPUB, the standard Apple application is the iBooks app, which is available for free in the App Store. If you use the Kindle app on your Apple device, you can select to open the file with your Kindle app.

Sideloaded Your iPad, iPhone or iPod Touch

- 1) Download your EPUB file from Angelus Press to your computer.
- 2) Add the downloaded file to iTunes on your computer.
- 3) Add your eBook to your iTunes library by clicking "File", then "Add to Library" and selecting your EPUB file.
- 4) Connect your Apple device to your computer with the supplied USB cable.
- 5) Select the eBook in the Books panel in iTunes, then click "Sync" ("Sync iPad", "Sync iPhone" or "Sync iPod Touch")
- 6) In iTunes, eject your device.
- 7) Your eBook should now be accessible in the iBooks application on your device.

If you downloaded the file using your iPhone, then the appropriate app should recognize the file type when you select the attachment.
