MAXPEDITION

FEATURES

EDGEPEAK™

Lockable main compartment

Two-way access to fully loop-lined rear CCW compartment

CCW compartment with Security Lockout Strip

Adjustable and stowable stabilizer strap

Ambidextrous sling pack with quick release straps

Custom fabricated Shapeshift™ webbing handle

Custom molded fleece-lined semi-rigid pocket

Dedicated padded tablet compartment

Attachment Lattice System - ATLAS™
Cut from 840D Nylon-TPU Composite

FEATURES - FRONTAL

FEATURES - REAR

EDGEPEAK™

Ambidextrous sling pack with quick release straps

CCW compartment with Security Lockout Strip

Two-way access to fully loop-lined rear CCW compartment

Adjustable and stowable stabilizer strap

Bi-Level high grade 3D airmesh backing

ATTACHMENT LATTICE SYSTEM - ATLAS™

ATLAS™ panels, which are cut from an ultra-tough 840-Denier Nylon-TPU composite, can be used for easy attachment of MOLLE-compatible pouches. The composite material is resistant to water, weather, heat, cold, UV and abrasion.

TO ATTACH ACCESSORIES USING THE TACTIC® POLYMER JOINING CLIPS:

1 Slide the clip through attachment backing of the pouch until head catches, then insert tail under the first row on the pack/garment.

2 Weave the tail back through the next row on the pouch.

3 Weave the tail through the next row on the pack/garment.

4 Repeat weaving process as needed depending on the length of the clip.

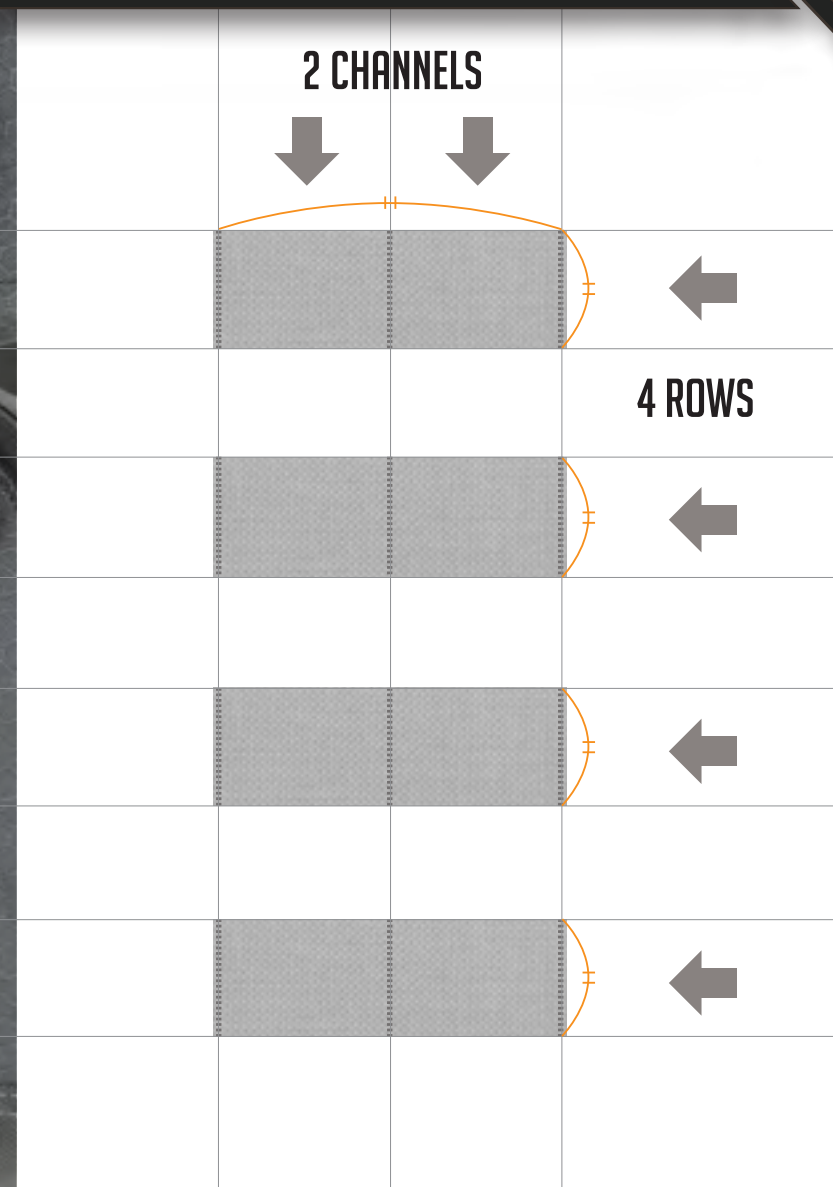

5 Insert the tail under the bridge, making sure both the tab and the tooth have both clicked into place.

6 Maximum strength and security are achieved when the pouch and the pack/garment are fully interwoven.

MOLLE/PALS EQUIVALENT

FUNCTIONS - FRONTAL

EDGEPEAK™

CUSTOM FABRICATED SHAPESHIFT™ WEBBING HANDLE

This specially developed narrow fabric transitions seamlessly between flat to round cross sections. Flat webbing may be abrasive on hands, so the rounder Shapeshift™ webbing makes the pack more comfortable to hand carry.

LOCKABLE MAIN COMPARTMENT

Lockable YKK#10 zipper sliders allow you to secure the main compartment with a pad lock, keeping your valuables safe and secure. Bring the sliders together until the hoops are overlapping, put the lock through, and secure the lock. Maxpedition® recommends a TSA approved lock when traveling.

CUSTOM MOLDED FLEECE-LINED SEMI-RIGID POCKET

With a semi-rigid exterior and soft interior, this pocket is ideal for storing sunglasses, electronics, and valuables that you do not want to get scratched or broken. A loop-lined field has been added to the exterior to attach morale patches.

POSITIVE GRIP ZIPPER PULLS

Positive grip zipper pulls are designed to fit a finger in order to get a better grip when opening/closing zippers. They also allow you to grab them from any direction and get a positive grip.

FUNCTIONS - REAR

CCW COMPARTMENT WITH DOUBLE SECURITY CLOSURE

Since the back of the pack has dual side access, a Security Lockout Strip is included. To secure the zipper that is not being used, open that zipper fully. Place the Lockout Strip face down on the loop lining, as close to the zipper track as possible. Using both hands, compress the compartment so the Security Lockout Strip is attached to both sides of the loop lining. Close the zipper and that opening is now fully secure and the compartment can only be accessed from one side. This extra security measure also prevents items from accidentally breaching the zipper and falling out of the pack.

ADJUSTABLE AND STOWABLE STABILIZER STRAP

After the shoulder strap has been fitted properly, buckle the stabilizer strap and cinch to compress. Use the elastic loop to keep excess strap webbing from hanging loose. This will enable you to distribute the pack weight more evenly.

To stow the stabilizer strap, tuck the buckle and webbing into the enclosed area until all components are securely stored.

AMBIDEXTROUS SLING PACK WITH QUICK RELEASE STRAPS

To adjust the main sling strap, put on the pack and pull the adjustment strap downwards at about a 30 degree angle downwards. As soon as the lower part of the pack is level with your hipbones (or in a comfortable position), stop pulling the adjustment straps and buckle the stabilizer strap. Use the elastic loop to keep excess strap webbing from hanging loose.

To change the strap for opposite side carry, unclip the strap from the D-ring. Move the clip to the opposite D-ring and clip to secure. The stabilizer strap should be moved to the D-ring not being used by the sling pack strap.

FUNCTIONS - INTERNAL

EDGEPEAK™

FLEECE-LINED SEMI-RIGID POCKET

With a semi-rigid exterior and soft interior, this pocket is ideal for storing sunglasses, electronics, and valuables that you do not want to get scratched or broken. A Gossamer™ mesh pocket is also included for additional organization.

MAIN COMPARTMENT

Multiple Gossamer™ mesh pockets and a padded tablet pocket can be used to keep your gear stored properly. A high visibility grayscale interior makes finding objects much easier.

FRONT ADMIN COMPARTMENT

Pockets and sleeves are available to keep small and medium objects organized and secure. A Keyper™ is supplied in the front pocket, which allows you to easily attach and locate your keys.

FRAY-RESISTANT GOSSAMER™ MESH

Gossamer™ mesh pockets are a medium gray while other details such as elastic loops and zippers are dark gray, providing visually distinguishable areas for gear storage. The Gossamer mesh is also partially see-through in order to view contents without opening the pockets.

SUBTLE HEXAGON PATTERN FABRIC

The inside is lined with a gray 420-Denier nylon fabric. The fabric is heat-embossed with a light tessellated hexagon pattern and can only be seen in certain angles of light. This serves as an anti-counterfeit measure so you know you are getting a genuine Maxpedition® product. To check for the hexagon fabric, open the main compartment of the pack. Slowly move the pack back and forth so that different angles put lighting on the fabric. If the hexagons cannot be seen in the fabric, it is not a genuine Maxpedition® product.

CARE TIPS

GENUINE YKK® ZIPPERS AND ZIPPER TRACKS

To increase the longevity of the YKK® zippers and tracks:

- Zippers should be kept away from directly striking hard objects (e.g. stones etc.).
- Avoid improper treatment of the painted (coated) zippers, such as direct striking, scratching, or wearing against hard objects.
- Do not apply strong or high concentrations of bleaching agents.
- Do not forcibly close a zipper in a bag that has been overfilled.
- If a slider is caught on thread or cloth, do not free the slider by force. Pull the slider back, removing the trapped thread or cloth. When the slider bites deeply into cloth, do not force it back but work it back gently.

CLEANING INSTRUCTIONS

- After each trip, thoroughly clean your pack.
- Rinse your pack with fresh water if dirt, sweat, salt and stains have worked their way into fabrics, webbing or mesh.
- To clean, simply wipe down with a damp cloth and allow the gear to dry naturally in a well-ventilated area out of direct sunlight.
- Do not machine wash.
- Do not use detergent or bleach on fabrics or webbing.
- Clean the zippers using a mild soap, warm water and a soft brush. Flush water and soap through the buckles. Keeping dirt and debris out of the zippers and buckles will help keep them in proper working condition.

AMPLE INTERNAL ORGANIZATION

Multiple pockets and elastic straps have been added to the interior compartments for excellent organization. Keep small items together in one of the numerous pockets, and securely hold larger items using the elastic straps. A Keyper™ is supplied in the front pocket, which allows you to easily attach and locate your keys.
