MAXPEDITION®

EXTERIOR GARMENT HOOK / LOOP CONNECTOR

To use the garment hook, unclip the buckle, then grab the hook and hang from a closet rod or bathroom hook.

To store the garment hook, fold it under the flap, then place the hook and clip under the strip of webbing to secure them. Clip the male end of the buckle into the opposite female buckle. Pull the webbing tight, and use the elastic loop to keep excess strap webbing from hanging loose.

To hang the bag using the webbing loop connector, adjust the length of the webbing on the male end. Use the elastic loop to keep excess strap webbing from hanging loose. Place the webbing over the attachment area, then loop around and clip into the closest female buckle.

MAIN COMPARTMENT

Multiple Gossamer™ mesh pockets and elastic straps can be used to keep your gear stored properly and in multiple configurations. A high visibility grayscale interior makes finding objects much easier.

A detachable zippered mesh pocket, measuring 9 (L) x 6 (H) in, is perfect for small bottles of liquids that need to go through airport security screening. The 1 quart pouch fits the 3-1-1 TSA rules. Simply pinch the ends of the spring clips and slide the clips out of the webbing loops. Place the loose end of the clip under the tab to secure it.

To re-attach the pocket, pinch the ends of the spring clip and slide the loose ends of the clips into the webbing loops. Place the loose end of the clip under the tab to secure it.

A shatter-proof mirror placed at the top of the bag can be used to check your image while on the go.

A hook & loop backing keeps the mirror in place while travelling.

CARE TIPS

CUSTOM FABRICATED SHAPESHIFT™ WEBBING HANDLE

This specially developed narrow fabric transitions seamlessly between flat to round cross sections. Flat webbing may be abrasive on hands, so the rounder Shapeshift™ webbing makes the pack more comfortable to hand carry.

FRAY-RESISTANT GOSSAMER™ MESH

Gossamer™ mesh pockets are a medium gray while other details such as elastic loops and zippers are dark gray, providing visually distinguishable areas for gear storage. The Gossamer mesh is also partially see-through in order to view contents without opening the pockets.

SUBTLE HEXAGON PATTERN FABRIC

The inside is lined with a gray 420-Denier nylon fabric. The fabric is heat-embossed with a light tessellated hexagon pattern and can only be seen in certain angles of light. This serves as an anti-counterfeit measure so you know you are getting a genuine Maxpedition® product. To check for the hexagon fabric, open the main compartment of the pack. Slowly move the pack back and forth so that different angles put lighting on the fabric. If the hexagons cannot be seen in the fabric, it is not a genuine Maxpedition® product.

GENUINE YKK® ZIPPERS AND ZIPPER TRACKS

To increase the longevity of the YKK® zippers and tracks:

- Zippers should be kept away from directly striking hard objects (e.g. stones etc.).
- Avoid improper treatment of the painted (coated) zippers, such as direct striking, scratching, or wearing against hard objects.
- Do not apply strong or high concentrations of bleaching agents.
- Do not forcibly close a zipper in a bag that has been overfilled.
- If a slider is caught on thread or cloth, do not free the slider by force. Pull the slider back, removing the trapped thread or cloth. When the slider bites deeply into cloth, do not force it back but work it back gently.

CLEANING INSTRUCTIONS

- After each trip, thoroughly clean your pack.
- Rinse your pack with fresh water if dirt, sweat, salt and stains have worked their way into fabrics, webbing or mesh.
 - To clean, simply wipe down with a damp cloth and allow the gear to dry naturally in a well-ventilated area out of direct sunlight.
 - Do not machine wash.
 - Do not use detergent or bleach on fabrics or webbing.
 - Clean the zippers using a mild soap, warm water and a soft brush. Flush water and soap through the buckles. Keeping dirt and debris out of the zippers and buckles will help keep them in proper working condition.
