MAXPEDITION

COLOR COORDINATED

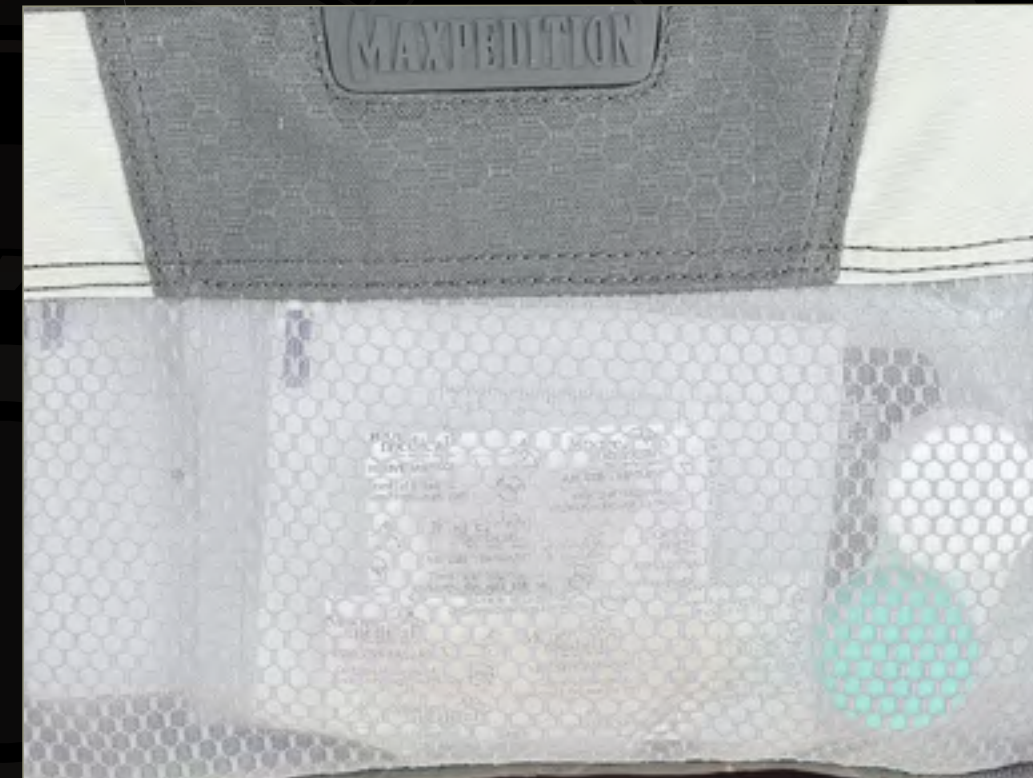

The packing cubes have been designed to be used with larger AGR bags and packs, such as the Ironcloud™ and Ironstorm™. The fabric colors of the packing cubes match the very visible grayscale interior lining of other AGR products.

FUNCTIONS

PCS™ PCM™ PCL™

SEATBELT WEBBING CARRY HANDLE

A skin-friendly seatbelt webbing handle at the top makes the pack more comfortable to carry.

FRAY-RESISTANT GOSSAMER™ MESH

The Gossamer™ mesh exterior and pockets are partially see-through in order to view contents without opening the pack.

MAIN COMPARTMENT

The main compartment has a two-way zippered opening for maximum compression. There is also an interior Gossamer™ mesh zipper pocket for further organization of contents.

Smaller packing cubes can be used for items such as undergarments, socks, belts, and ties. Larger packing cubes can be used for articles of clothing or other loose objects.

The packing cubes have been designed to nest inside each other for compact storage.

SUBTLE HEXAGON PATTERN FABRIC

There are panels of gray 420-Denier nylon fabric on the exterior and interior. The fabric is heat-embossed with a light tessellated hexagon pattern and can only be seen in certain angles of light. This serves as an anti-counterfeit measure so you know you are getting a genuine Maxpedition® product.

To check for the hexagon fabric, open the main compartment of the pack. Slowly move the pack back and forth so that different angles put lighting on the fabric. If the hexagons cannot be seen in the fabric, it is not a genuine Maxpedition® product.

CARE TIPS

GENUINE YKK® ZIPPERS AND ZIPPER TRACKS

- To increase the longevity of the YKK® zippers and tracks:
- Zippers should be kept away from directly striking hard objects (e.g. stones etc.).
 - Avoid improper treatment of the painted (coated) zippers, such as direct striking, scratching, or wearing against hard objects.
 - Do not apply strong or high concentrations of bleaching agents.
 - Do not forcibly close a zipper in a bag that has been overfilled.
 - If a slider is caught on thread or cloth, do not free the slider by force. Pull the slider back, removing the trapped thread or cloth. When the slider bites deeply into cloth, do not force it back but work it back gently.

CLEANING INSTRUCTIONS

- After each trip, thoroughly clean your pack.
- Rinse your pack with fresh water if dirt, sweat, salt and stains have worked their way into fabrics, webbing or mesh.
- To clean, simply wipe down with a damp cloth and allow the gear to dry naturally in a well-ventilated area out of direct sunlight.
- Do not machine wash.
- Do not use detergent or bleach on fabrics or webbing.
- Clean the zippers using a mild soap, warm water and a soft brush. Flush water and soap through the buckles. Keeping dirt and debris out of the zippers and buckles will help keep them in proper working condition.
