

PROEARS The new Pro Ears Ultra Sleek muffs are some of the lightest and most comfortable on the market. At just 7.1 oz, their sleek design allows for all day wear in the toughest conditions while providing maximum passive protection with an NRR of 26. Simple headband adjustments require no tools and the ears seals are very soft and plush for extra comfort. Available in multiple color options (Charlie Ricci is holding the Skulls model), these thin, light muffs are ready for all your hearing protection needs. Pro Ears are made in the USA and the Ultra series models have a one-year warranty.

MAXPEDITION The bag CEO Tim Tang is wearing is called the Unterduffel™ Adventure Bag. It is the smallest of our Adventure Bags, the largest being the Doppelduffel™ and the medium size the Fliegerduffel™. We came out with the Unterduffel because of changing airline policies that are mandating smaller carry-on sizes. The Unterduffel was also sized to fit under most airline seats. This bag is due out in the next few months, with an MSRP has yet to be announced.
