

Fast-Acting Coagulant for Wastewater Treatment

Versatile, Compatible with Many Systems

Non-Caustic, Safe and Easy to Handle

Can Be Injected in Continuous Stream

LIQUID ALUM

Sulfate Solution and Coagulant

For Water Maze Wash-Water Treatment Systems

An Aluminum Sulfate Solution Designed to Aid in the Separating and Disposing of Contaminants in a Waste Stream

Water Maze Liquid Alum is a 48.5 % liquid aluminum sulfate solution for use as a coagulant in water treatment. It is ideally suited for use with Water Maze wash-water treatment systems but is also suitable for use in a wide variety of wastewater treatment systems and applications.

Liquid Alum causes oil and other solids in a waste stream to coagulate and settle out facilitating the

HMS RATING		
Health	2	Degree of Hazard
Flammability	0	4 - Very High
Reactivity	1	3 - High

		1 - Slight
		0 - Insignificant

easy removal of contaminants from the wastewater.

Directions for Use

Water Maze Liquid Alum can be used at full strength or diluted as needed for specific applications. Best results are obtained when Water Maze Liquid Alum is injected directly into the waste stream on a continuous basis.

Handling and Storage

Keep container closed when not in use. Empty containers should be rinsed thoroughly and disposed of properly. Unused material is considered a hazardous waste if discarded. Material should be stored at temperatures of 45°F or higher. Protect from freezing.
