

# No Rust

Evaporator Corrosion Inhibitor

*Concentrated for Cost-Effective Use*

*Controls Corrosion from Hot Water or Steam*

*Helps Prevent Deposits in Evaporator Tubs*

*Compatible with Most Water-Based Systems*

**Designed for Water Maze Evaporators**

## A Highly Concentrated, Multi-Component Agent Formulated to Provide Corrosion Protection in Water Treatment Systems

WaterMaze No Rust Evaporator Corrosion Inhibitor is a concentrated, multi-component product designed to provide corrosion protection in industrial wastewater evaporators, such as the Water Maze HBG and WB systems.

### HMS RATING

		Degree of Hazard
Health	3	4 - Very High
Flammability	1	3 - High
Reactivity	1	2 - Moderate
Personal Protection	B	1 - Slight
		0 - Insignificant

This unique blend of two chemical components, when continuously injected into the wastewater, will prevent corrosion to the wetted metal

surfaces of a wastewater evaporator. Because one of the two components in No Rust will steam distill, the second component provides the added protection against corrosion of the metal surfaces that come in contact with the steam.

WaterMaze No Rust also acts as a dispersing agent, which helps prevent deposits from building up in the evaporator tub. It also facilitates the removal of the concentrates at the end of the evaporation cycle. This helps maintain evaporator energy efficiency during evaporation and adds to the ease of evaporator cleaning and concentrate removal.

### Directions for Use

Mix 1/2 to 1-gallon of WaterMaze No Rust Evaporator Corrosion Inhibitor to 5-gallons of water and mix thoroughly. Feed continuously with a chemical metering pump to the waste stream as it enters the evaporator to insure adequate mixing.

**No Rust**  
55 Gallons: #8.749-781.0

**No Rust**  
5 Gallons: #8.749-782.0

### SAFETY AND FIRST AID

#### CAUTION

Read the Material Safety Data Sheet before using this product. Keep out of the reach of children. May cause eye irritation. Avoid prolonged or repeated contact with the skin. Harmful if swallowed. Use with adequate ventilation.

#### FIRST AID

**Eyes:** Flush with water for at least 15 minutes. Get medical attention immediately.

**Skin:** Wash thoroughly with soap and water. If irritation develops or persists, get medical attention immediately. Remove and launder contaminated clothing thoroughly before reuse.

**Internal:** Do NOT induce vomiting. Drink one or two glasses of water or milk. Avoid alcohol and alcohol-related products. Get medical attention immediately.
