1-800-MELT-ICE

CMA™ icemelter

Winter Warrior CMA Icemelter™ is made from **100% Calcium Magnesium Acetate (CMA)**. CMA is made of dolomite lime and acetic acid, and is perfect where corrosion or environmental issues are of concern.

▶ **Biodegradable**

Winter Warrior CMA Icemelter™ is made from 100% Calcium Magnesium Acetate (CMA). It is biodegradable, with low toxicity and very safe on the environment. Acetate biodegrades down to carbon dioxide water. Winter Warrior CMA Icemelter™ has a typical pH of 8-10 in a 10% solution.

▶ **Non-Corrosive**

Winter Warrior CMA Icemelter™ is chloride free and completely non-corrosive. For this reason, it is a great product to be used around areas containing steel or metal. It is commonly used on concrete roads and bridge decks for this reason. In fact, CMA is added to icemelters to act as a corrosion inhibitor.

▶ **Safe on Concrete**

Winter Warrior CMA Icemelter™ is safe on concrete. It does not chemically harm or alter concrete like other de-icers on the market, and it does not cause any concrete spalling.

▶ **Performs to -12°C (10°F)**

Winter Warrior CMA Icemelter™ performs equally as well as salt products, but is much safer. It requires fewer applications than other icemelters.

▶ **Chloride / Nitrogen Free**

Winter Warrior CMA Icemelter™ is completely chloride and nitrogen free, meaning that it is completely safe. De-icers, like urea, contain nitrogen, which breaks down to ammonia and is quite toxic to aquatic life even at low levels.

▶ **Easy to Apply**

Winter Warrior CMA Icemelter™ is easy to apply. It can be applied in its solid pellet form or can be made into a liquid. In pellet format, Winter Warrior CMA Icemelter™ should be applied at a rate of 15-20 lb per 1,000 square feet (75-100 g/m²). It can also be mixed with salt and sand. To convert the product into a liquid format, simply dilute 25% product into 75% water. Liquid CMA is often used as an anti-icing agent.

▶ **Green Building Compliant**

Winter Warrior CMA Icemelter™ is completely chloride free, making it compliant for Green Buildings / Properties. While it does meet those strict standards, Winter Warrior Enviro LEADER Icemelter™ is a less expensive alternative that also meets the same standards.

Item	Product Size	Units/Pallet	Pallet Weight	UPC
