

WATER BASED INTERIOR FLOOR DYE PRE-CONDITIONER

This formula is intended for use before applying Littlefair's Water Based Floor Dye. It will penetrate bare pine and porous hardwoods, partially sealing the grain allowing the dye to colour the wood more evenly. It will create a clearer, lighter, more 'modern' look if desired, rather than a 'rustic, aged' effect.

WATER BASED INTERIOR FLOOR DYE

Designed to penetrate the wood to create both softwood colours and authentic hardwood shades on new or re-sanded floorboards.

TITAN TOPCOAT

A multipurpose, low odour and quick drying waterproof coating - providing a tough but flexible non-yellowing finish. It can be applied to most types of wood and sheet materials, such as plywood and MDF.

In addition, it will bond to many other surfaces including masonry, concrete, terracotta, metal and laminates.
