LIST OF TABLES	6
LIST OF FIGURES	7
INTRODUCTION	9

CHAPTER ONE

RAPTOR SURVIVAL STRATEGIES

1.1 Hunting techniques	11
1.2 Wild diet	22

CHAPTER TWO

THE INJURED RAPTOR

2.1 Source of birds for rehabilitation ..	23
2.2 Housing the injured raptor	27
2.3 Enclosure construction	30
2.4 Choosing the right rehabilitation method	31
2.5 Rehabilitation techniques	36
2.6 Review of injuries, consequences, and options	37
2.7 Aviary exercise (forced exercise) .	40
2.8 Dealing with orphaned raptors	44
2.9 Preparing the food	47
2.10 Behavioral development	48
2.11 Reintroducing orphaned raptors ...	49
2.12 The starving raptor	54

CHAPTER THREE

RELEASING REHABILITATED RAPTORS

3.1 Choosing release sites	55
----------------------------------	----

CHAPTER FOUR

MONITORING RELEASED BIRDS

4.1 Post release monitoring	57
4.2 Using transmitters	57
4.3 Mounting transmitters	58
4.4 Radio tracking trouble shooting ...	61
4.5 Radio tracking guidelines	62
4.6 Possible complications	62
4.7 Banding (ringing) for release	63
4.8 The failed release	64

CHAPTER FIVE

THE CAPTIVE RAPTOR

5.1 Managing the trained raptor	65
5.2 Beak care	65
5.3 Feather care	67
5.4 Molting	68
5.5 Repairing feathers	68
5.6 Housing trained raptors	70

CHAPTER SIX

RAPTOR BEHAVIOR & TRAINING

6.1 Motivation	73
6.2 Training methods	73
6.3 Lure training	76
6.4. Unwanted behavior	81
6.5 Weight management during training	83
6.6 Improving and maintaining fitness	86
6.7 Choosing the right raptor for a demonstration	89

CHAPTER SEVEN

THE RAPTOR AVIARY

7.1 Managing the aviary display	93
7.2 Designing the aviary	93
7.3 Perching	94
7.4 Feeding raptors in aviaries	95
7.5 Mixing species	96

RAPTOR MANAGEMENT

PHOTO GALLERY	97
----------------------------	----

CHAPTER EIGHT

RAPTOR MEDICINE

8.1 Introduction	113
8.2 Initial first aid	113
8.3 Anaesthesia	114
8.4 Management of soft tissue injuries	116
8.5 Management of orthopaedic injuries	117
8.6 Ocular trauma	123
8.7 Bumblefoot	124

8.8	Trichomoniasis	125
8.9	Endoparasitism	126
8.10	Ectoparasitism	126
8.11	Poisoning	127
8.12	Miscellaneous conditions	128
8.13	Release considerations	129

CHAPTER NINE

THE RAPTOR DIET

9.1	Dietary requirements	131
-----	----------------------	-----

CHAPTER TEN

EQUIPMENT

10.1	Equipment for holding raptors	137
10.2	Using hoods	137
10.3	Jesses and leashes	140
10.4	Swivels	142
10.5	Making lures	142
10.6	The creance	143
10.7	Perches	144
10.8	Using bells	148

APPENDIX 1

1.1	Live food production	149
1.2	Breeding rats and mice	149
1.3	Freezing food before use and using road kills	149

APPENDIX 2

2.1	Putting rehabilitation and foraging in context	151
-----	--	-----

LIST OF TABLES

Table 1.1.1	Comparable wing loadings.	12
Table 1.1.2	Search strategies by species.	15
Table 1.1.3	Attack strategies by species.	21
Table 2.2.4	Enclosure dimensions in meters.	28
Table 2.6.1	Injuries and their consequences.	37
Table 2.6.2	Primary and secondary problems.	40
Table 2.7.2	Phase one aviary exercise routines.	42
Table 2.7.3	Phase two exercise routines.	42
Table 2.7.4	Phase three exercise regimes for specific species.	43
Table 2.8.1.	Raptor chick development, fledging to independence.	45
Table 2.8.2	Ascertaining age in days. Specific examples.	46
Table 2.10.1.	Behavioral traits learned during rearing.	48
Table 4.3.4	Transmitters used on rehabilitated raptors	60
Table 4.3.5	Transmitters used on raptors both in the falconry and in the rehabilitation context	60
Table 5.2.1.	Daily diet for some raptors in zoos.	66
Table 5.5.1	Feather repair, compatible species.	70
Table 6.6.1	Recommended exercise regimes.	87
Table 6.6.2	Exercise targets after four weeks.	88
Table 6.6.3	Attack distances and duration between attacks.	88
Table 6.7.1	Demonstrable attack strategies and their effectiveness.	90
Table 6.7.2	Demonstrable search strategies.	90
Table 6.10.3	Species suitable for demonstrations.	91
Table 9.1.1	Food consumption of raptors.	131
Table 9.1.2	Feeding nocturnal raptors.	133
Table 9.1.3	Food consumption of diurnal raptors.	134
Table 9.1.4	Nutrient composition of a range of raptor Foods.	135

APPENDIX 2 TABLES

Table A.1 Hunt success rates over 15 days for a hand-raised male Gabar goshawk . . .	152
Table A.2 Hunt success rates over 10 days for a parent-raised Gabar goshawk	152
Table A.3 Hunt success of a breeding male Gabar goshawk, Zimbabwe.	153
Table A.4 Foraging success of a pair of Australian brown goshawks, southeastern Australia.	154
Table A.5 Lanner falcon's hunt success, 6:00 A.M.–7:30 A.M., 17 September, Zimbabwe. . .	155
Table A.6 Lanner falcon's hunt success, 17:00 P.M.–18:30 P.M., 18 September, Zimbabwe.	155
Table A.7 Lanner falcon's hunt success, 17:00 P.M.–18:30 P.M., 23 September, Zimbabwe.	155
Table A.8 Hunt success rate of a Lanner falcon under controlled conditions over 4 days. June 1986, Zimbabwe.	156
Table A.9 Birds listed as found on the Independent Bird Register, June 1999.	157
Table A.10 Raptors rehabilitated 1997. Bird of Prey Trust.	157
Table A.11 Raptors rehabilitated 1998. Bird of Prey Trust.	157
Table A.12 Raptors treated by Raptor Rescue (UK) 1993–1996 annual surveys.	158
Table A.13 Number and species of falcons bred in captivity over 5 years.	158
Table A.14 Raptors rehabilitated in Victoria, May 1996–May 1999.	159
Table A.15 Raptors rehabilitated by Healesville Sanctuary, Victoria, Australia, Jan. 1994–May 1995.	160
Table A.16 Raptors in Care at the Minnesota Raptor Center. Jan. 1995.	160
Table A.17 Raptors in care at the Minnesota Raptor Center, Jan. 1996.	161
Table A.18 Raptors rehabilitated in 1997 by the Bird of Prey Foundation.	161
Table A.19 Foraging strategies of mixed raptor genera.	163

LIST OF FIGURES

Figure 1.1.2a Simple glide attack.	13
Figure 1.1.2b Typical long distance glide attack by a Martial eagle in Africa.	14
Figure 1.1.2c Prospecting strategy. Black sparrowhawk attacks a francolin.	14
Figure 1.1.2d Hover and drop.	15
Figure 1.1.3a Hover and stoop strategy.	19
Figure 1.1.3b Falcon stoop and subsequent tail chase.	19
Figure 1.1.3c Falcon attack.	20
Figure 1.1.3d Golden eagle's attack strategy.	20
Figure 1.2 Typical fish eagle attack strategy.	22
Figure 2.1.2a Restraining a small falcon.	24
Figure 2.1.2b Restraining a large falcon.	24
Figure 2.1.3a Transport box.	25
Figure 2.1.3b Transport box with perch for gripping	25
Figure 2.2.5a A flat surface for a perch is not healthy during long periods of inactivity.	29
Figure 2.2.5b A perch surface that has a variable texture is by far more comfortable.	29
Figure 2.8.3 Brooder box.	47
Figure 2.11.1a Standard hack box.	49
Figure 2.11.1b Hack box.	50
Figure 2.11.2a Bald eagle chick reared for tame hacking being fed using a puppet to avoid imprinting to humans.	51
Figure 2.11.2b Nine-week-old bald eagle chick.	52
Figure 2.11.2c Temporary anklets clipped on with a press stud.	53
Figure 4.3.2 Attaching a tail mounted transmitter and bell.	58
Figure 4.3.3a Harness for transmitter.	59
Figure 4.3.3b Mounted transmitter harness.	59
Figure 4.3.3c Neck mounted transmitter.	59
Figure 4.3.3d Transmitter attached with a leather hewit and a press stud.	59
Figure 4.4a One hazard that confronts tail mounted transmitters.	61
Figure 4.4b Asking for trouble: transmitter caught in a fence.	61

Figure 4.5 Basic yagi aerial.	62	Figure 9.1 A passage saker perched on a fine Arab block perch.	136
Figure 4.6 Radio tracking in hilly terrain.	63	Figure 10.2a Various hood patterns.	138
Figure 4.7a Young peregrine falcon being banded in nest before release	64	Figure 10.2b Basic hood.	138
Figure 4.7b David Hancock banding a bald eagle prior to release.	64	Figure 10.2c Simple Indian hood and Arab hood with neck mounted.	138
Figure 5.2 Bird with beak length reduced and filed.	65	Figure 10.2d Arab Hood.	139
Figure 5.3a Normal feather and feather that “died” during growth.	67	Figure 10.2e One method of holding a hood when hooding a falcon.	139
Figure 5.3b Paper tail guard.	67	Figure 10.2f Hooded falcon on bow perch.	139
Figure 5.5 Imping a feather.	69	Figure 10.3a Flying with slitted jesses is dangerous.	140
Figure 5.6a Basic mews.	71	Figure 10.3b Nylon jesses tied off with a figure of 8 knot.	140
Figure 5.6b Enclosed mews.	71	Figure 10.3c Arab leash attachment.	140
Figure 5.6c Holding pens for housing free lofted raptors.	71	Figure 10.3d Removable anklet (Hollywood jesse).	141
Figure 5.6d Dual pens for housing single orphans.	71	Figure 10.3e Parachute chord jesses.	141
Figure 5.6e Basic shelf perch.	72	Figure 10.3f Parachute chord leash extender.	141
Figure 5.6f Shelf perches.	72	Figure 10.4 Fitting the anklets and swivel.	142
Figure 6.3 Leather lure with wings attached.	77	Figure 10.5 Standard falcon lure.	143
Figure 6.3.1 Lure flights.	78	Figure 10.6 Attaching the creance.	144
Figure 6.4 Screaming for food.	82	Figure 10.7.1a Simple block perch made from a plastic plant pot filled with mortar mix.	145
Figure 6.5a Peregrine falcon’s weight loss and gain during training.	84	Figure 10.7.1b Block perch with an Arab leash attachment.	145
Figure 6.5b Male peregrine falcon’s weight loss over 8 hours.	84	Figure 10.7.1c Lathe-turned wooden block.	145
Figure 6.5c Weight loss of a released female peregrine.	85	Figure 10.7.1d Basic block—treated pine with metal stake inserted.	146
Figure 7.2 A simple aviary.	94	Figure 10.7.2a Basic steel bow perch.	146
Figure 7.3a Passage sparrowhawk on preferred round branch on bow perch.	95	Figure 10.7.2b Ring perch.	147
Figure 7.3b Falcons prefer to sit on flat surfaces.	95	Figure 10.7.2c Pole perch.	147
Figure 8.3a Brachial vein.	115	Figure 10.9a Bell and anklet.	148
Figure 8.3b Medial metatarsal vein.	115	Figure 10.8b Attaching a tail mounted transmitter and bell.	148
Figure 8.5.2a Raptor skeleton.	119	Figure 10.8c Attaching a leg mounted bell.	148
Figure 8.5.2b External fixture on a fractured humerus.	120	Figure 10.8d Mount a tail bell using a basic wire tie.	148
Figure 8.5.2c Fractured ulna with pin and external fixater.	121		
Figure 8.5.2d Metacarpal.	122		
Figure 8.5.2e Tibiotarsus.	122		
Figure 8.5.2f Ball bandage.	123
