Re: Community Healing: A Transcultural Model Book Endorsement

“Community Healing A Transcultural Model”, by Geneva Ensign expertly captures the basic understanding that must be comprehended before one can teach, train or profess to heal oneself or a community. It is a teaching tool that I highly recommend. Being an Aboriginal leader for many years and growing up on the reserve surrounded by the traditional teachings of my Stemtemma (Grandmother), I understand our culture and its importance. To be ready for the future, we must understand the past. The compilation of stories and experiences presented in this book gives a wholesome insight as to what we, as Indigenous People, are all about. I highly recommend and endorse Geneva’s book.

Sincerely,

Robert Louie
