

## Instructions for downloading BB Yarn supplies digital files

Those instructions explain how to obtain the digitally protected files from BB Yarn and to install and activate them on a computer running Windows® 64bit. Depending on your Windows® version, the appearance or wording might slightly differ, but the process remains the same.

Please navigate to [BB Yarns website](#) and purchase the files online. You will find all the files on the "weaving school" page and will be able to choose whatever file you like. Once payment has been processed you will notice a button to download the file. Press the button and make sure you download the files into your desired location on your computer. The files are contained in an archive file format, 'zip'.

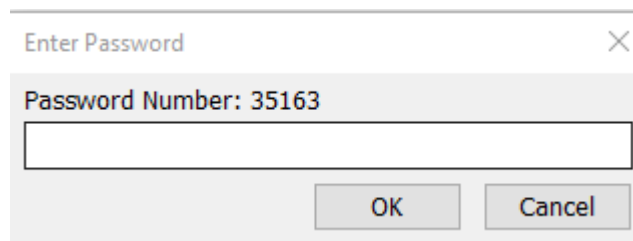

1. Click right hand button on the zip file and choose 'Extract all'
2. Select your destination for the files and press 'Extract'

BB Yarn Supplies online files are licensed to the purchaser (digitally protected) and will only be usable on the computer, where the files have been downloaded to.

Please follow the instructions to open the files. You will need Runtime webview2 to be able to view the files. Runtime webview2 is free and can easily be downloaded online. Most computers already have this webview2 installed. Let's find out...

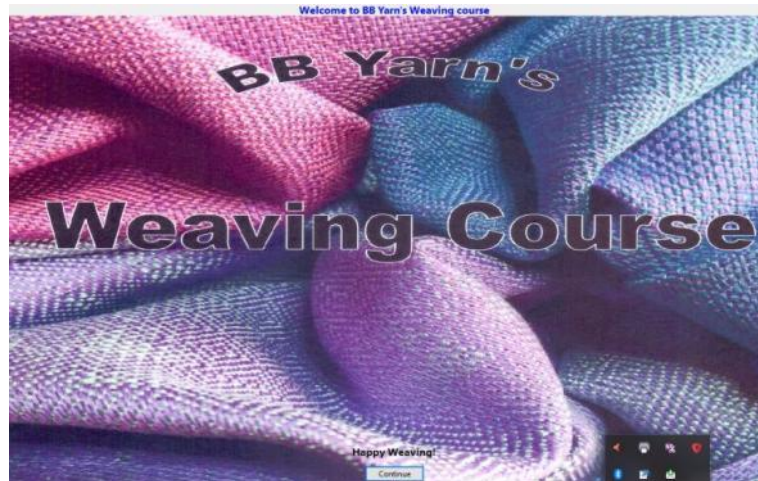

1. Double click on your course file and the password window is displayed.

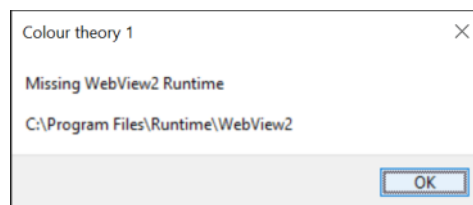

2. The next step is to copy the password number and send it in an email to [sales@bbyarn.com](mailto:sales@bbyarn.com) or send an SMS to 0402973655 or PM via BBYarn Supply Facebook along with the course package name you purchased. E.g. 'Colour Theory 1' 35163  
BBYarn will promptly send you a 9 digit license code to fill into the box. Then press OK and BB Yarn's weaving course front page will open.

### Note:

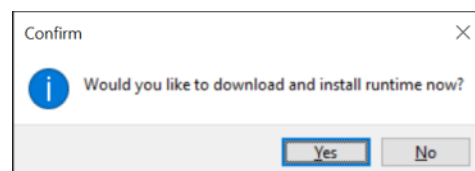

You will only need to ask for the password once. From now on the BB Yarn files will open immediately without asking for the password. You will only need another password when you change or upgrade your computer.

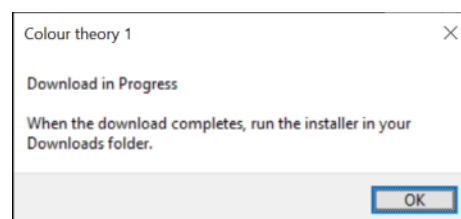

If the following pop-up window appears, your computer does not have the required WebView2 program and it must be downloaded or else please proceed directly to step 8

3. Press OK to continue, then the following window is displayed.

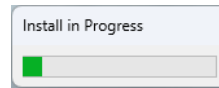

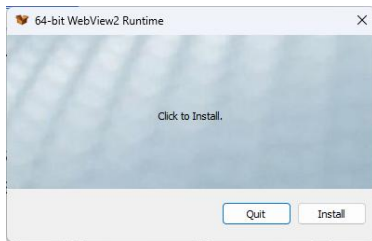

4. Click Yes and next window appears.

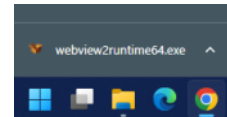

5. Click Ok and the window will close.  
WebView2 runtime will take a few minutes to download depending on the speed of your internet connection. It requires downloading only once and should be installed within minutes. All other BB Yarns digitally protected files will automatically detect and use it.
6. Check in your Windows® Download Folder, when the download is complete you will find webview2runtime64.exe or webview2runtime32.exe

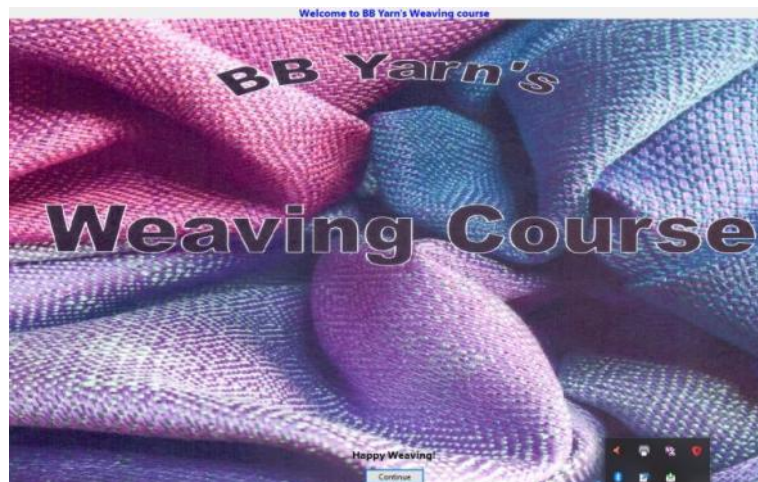

7. Double Click to run the executable and a window appears, click install. The windows will close automatically once installation is complete.

Note: You can also run this file from your browser directly. It will look like this.

8. Now, we can finally get to opening the course files.

9. Press "Continue" and your purchased files should be ready to be opened and used.

Enjoy and happy weaving  
Ursula
