

Promoting beneficial insects that are pollinators and/or natural predators of pests is an integral part of practicing integrated pest management. To effectively manage your insect populations, it is important to first distinguish between pests and beneficials. Please use this insect field guide to assist you with general insect identification. For insect identification specific to your location, be sure to contact your local state extension office for more information.

Cole Crop Pests

Cabbage Looper¹

Diamondback Moth²

Cabbage White Butterfly³

Flea Beetles⁴

Tarnished Plant Bugs²

Corn Crop Pests

Corn Earworm⁴

European Corn Borer⁵

Seedcorn Maggot⁴

Sap Beetles⁶

White Grubs⁷

Cucurbit Crop Pests

Aphids⁵

Cucumber Beetles⁴

Squash Bugs⁴

Whiteflies⁴

Leaf-footed Bugs⁸

Solanaceous Crop Pests

Armyworm Complex⁵

Thrips⁴

Green Stink Bugs⁹

Hornworms¹⁰

Brown Marmorated Stink Bugs¹¹

Beneficial Insects

Assassin Bugs¹²

Bees

Big-Eyed Bugs²

Braconid Wasps¹³

Damsel Bugs⁴

Ground Beetles¹⁴

Hoverflies (Syrphid Flies)⁷

Lacewing Larvae⁴

Lady Beetle Larvae⁵

Minute Pirate Bug (Insidious Flower Bug)¹⁵

Spiders²

Spined Soldier Bug (Predatory Stink Bug)¹⁶
