# BIKES

## FORKS

The Master and Sport forks utilize tapered tubing for increased strength and include chrome plated platforms that can be attached or removed simply. The Master, Sport and F.S.T. forks are all constructed of 4130 chromoly.

## HARO FREESTYLE HANDLEBAR

The exclusive Haro handlebar that comes on the Master and Sport complete bike is now available separately. Haro handlebars are all 4130 chromoly with a dropped 1" diameter knurled crossbar for the innovative freestyler. Colors are neon green, neon blue, white and chrome.

## HARO FREESTYLE TIRE

The new FS-175 and FS-200 tires by Haro are designed for Freestyle and Street riding. Made by National Tire of Japan, this tire features a unidirectional tread pattern and ultra-light construction. The aggressive block pattern and center ridge design provide optimum traction and reduced rolling resistance. You won't find our name in the tread pattern because we're serious about performance. Available in black, white, green and blue.

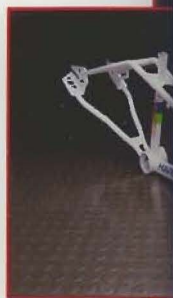

## HARO AXLE EXTENDERS

Brand new Haro aluminum axle extenders are the latest in Freestyle hardware. Available for either 24 TPI or 26 TPI axles. Colors are blue, black and silver.

## FST FRAMESET

The FST incorporates everything from freestyle to racing. It uses the extended seat stays that join the top-tube to make a standing area for tricks, yet the bike is still light enough for racing, and has a geometry for the track. So whether you freestyle or race, the FST has you covered.

## MASTER FRAME & FORK

The Master frame is the original frame for serious freestyle with twin top-tube construction that is proven best for any tricks. Redesigned drop-outs that incorporate the rear chain stays with the drop-outs to make a perfect platform for all of your tricks. Brazed on cable guides keep your brake cables out of the way. The new Haro fork is made of tapered tubing for strength and durability, along with removable foot pegs and brazed on cable guides on the backside of the fork. Both frame & fork are 100% 4130 chromoly. Framesets available in neon green, white and chrome.

## SPORT FRAME & FORK

The Sport frame is one-inch longer and has a slightly more kicked-out head angle than the Master, making it an excellent all-around freestyle frame. The seat stays are extended forward to meet the top-tube, making a platform for standing. The rear chainstays have been angled out and knurled to meet the redesigned drop-out, making an ideal platform for any trick. The new Haro forks include a set of removable foot pegs, and are made with tapered tubing for strength and durability. Both the frame and fork have brazed-on cable guides. The Sport frameset is 100% 4130 chromoly. Available in neon blue, white, and chrome.

### FST BIKE

The FST designates that this bike is for freestyle, street or track riding, and is the first affordable freestyle bike. The short wheelbase and moderately steep head angle delivers quick, controlled performance. A Sport top-tube configuration, DiaCompe front and rear brakes, 4130 chromoly tubing, down-tube gusset, and chromoly cranks add up to freestyle; but the light UKAI alloy rims, suntour free-wheel, National Panaracer tires and overall fun handling make this a great street bike and, believe it or not, an acceptable racing bike. You can't afford to own a freestyle bike for less than this.

The FST comes in dayglow red, white and chrome.

### THE MASTER BIKE

The Master is our top-of-the-line freestyle bike. New Sugino 3 piece tubular chromoly cranks, Oakley B-2 grips, Redline forklifter stems with Pott's bolts, MKS graphite pedals and the proven Skyway Tuff II wheels are all standard equipment. The brand new Haro 4130 chromoly handlebars have a lowered knurled crossbar, making over-the-bar tricks easy. Components such as the DiaCompe front and rear FS880 brakes, Tech 4 levers, a new Dominator seat and the Haro chromoly seatposts make the Master the only freestyle bike you'll ever need.

### THE SPORT BIKE

The Sport bike is one-inch longer and has a slightly more angled head-tube than the Master, making it a great all-around bike. The seat stays are extended forward to join the single top-tube, making a perfect standing area. The chain stays have been angled out and knurled to meet a new distinctive drop-out design, making an ideal platform for any maneuvers. The new forks are tapered for strength with removable pegs. The Sports components are picked especially for freestyle. These components include DGK wheels, Sugino 1 piece cranks, Haro handlebars, Haro chromoly seatposts and DiaCompe FS880 front and rear brakes. With all these great components, the Sport can take you to new heights in Freestyle. Available in neon blue, white and chrome.

## TECH SERIES GLOVES

The most technologically advanced and comfortable gloves on the market today are the new Tech Series Gloves made for Haro in Finland. These gloves are constructed with a molded foam back that is laminated with an outer lycra skin. The gloves feature man made leather palms and spandex material between fingers for amazing comfort. Sizes are small, medium and large. Colors are blue with white chevrons, black with white chevrons, red with white chevrons and grey with blue chevrons.

## HARO VENTED JERSEY

Take a closer look at this new jersey with bold supergraphics by Bob Haro. This jersey features a poly/cotton front with three solid colored panels running horizontally and a white vented back. Woven spandex sides match the spandex on the Haro pants. Sizes are boys small through men's extra large. Five team colors: red/white/blue/grey, red/white/black/grey, blue/green/white: Haro Factory, blue/grey/white: Haro Support, and black/grey/white.

## HARO VENTED PANT

Haro Vented pants feature innovations found in no other pant. Deluxe style pant features molded removable knee pads for the ultimate in knee/shin protection, a Haro exclusive. Vented stretch polyester thigh panel is added to the deluxe style for added freedom of movement and cooling. Logo embroidered spandex side stripes down the legs offer additional comfort and fit. New this year on back of pants and shins is satinol, a tighter woven nylon pack cloth material with a satin gloss used for added strength and tear resistant protection. Hand sewn on the shins are the words "Haro USA." Elastic waist and adjustable buckle keeps pants comfortable without being too tight or too loose on you. All pants are tricot lined and feature hip pads. Available in five team colors: Dk Blue, Lt Blue/White, red/black/white, black/grey/white, yellow/blue, red/white/blue. Sizes 22 through 34.

## HARO STANDARD PANT

Haro Standard pants are constructed of a nylon pack cloth material, fully lined with tricot for freedom of movement and comfort. Logo embroidered spandex side strip and sewn in knee and hip pads for added protection. Elastic waist band and adjustable buckle keeps pants comfortable on you. Pants available in five team colors: Dk Blue, Lt Blue/White, red/white/blue, black/grey/white, red/black/white and blue/yellow. Sizes 22 through 34.

## HARO LEATHER GLOVES

The standard in BMX gloves. These gloves are designed with light palm padding to minimize bunching on handle grips and to reduce fatigue. Reinforced double stitching in critical areas and flexible padding are used to protect the fingers and outside of the hand. Haro's unique spandex cuff and ventilated spandex material between the fingers trap perspiration in and allow air flow to cool hands naturally. Gloves come in several color combinations: Red, white and blue, blue and white, black and white, blue and yellow, red black and white, sizes xs, s, m, and large.

## TECH SERIES KNEE GUARD

The new Tech Series Knee Guard utilizes two plastic caps and a unique molded foam exterior padding. The knee cap is replaceable (extra pair included) and features a dual density foam laminate bonded to the inside of the cap. There's also a removable inner pad that's molded to conform to your knee and both velcro straps and an elastic back to hold it on. It's protective equipment designed to withstand the demands of reentry and impact.

## TECH SERIES ELBOW GUARD

Introducing the new Tech Series Elbow Guard, made for Haro in Finland. This new design features ultralight molded padding for more protection. Elastic straps and velcro fasteners are used to prevent the pads from sliding during impact. Available in sizes small and large, colors red, blue, black and grey.

## COTTON GLOVES

Haro takes the cotton gloves a step farther, 100% cotton makes this glove a sure fit. The exclusive Haro lateral line palm pattern provides excellent traction on the grips under any weather condition. Computer like graphics are on the surface of the glove with the word Haro and our chevron logo. Gloves are available in red, blue, black, white and yellow. Sizes Small and Large.

## HARO PADS

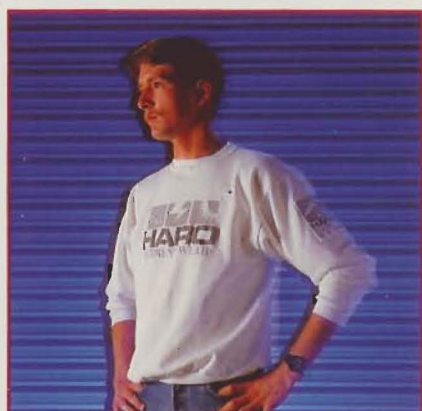

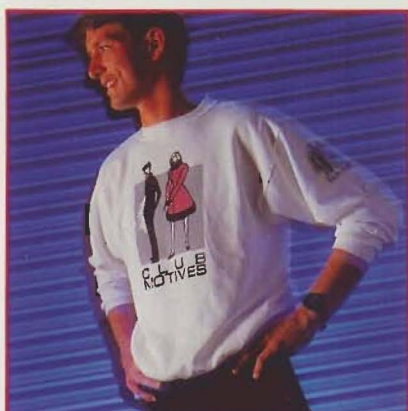

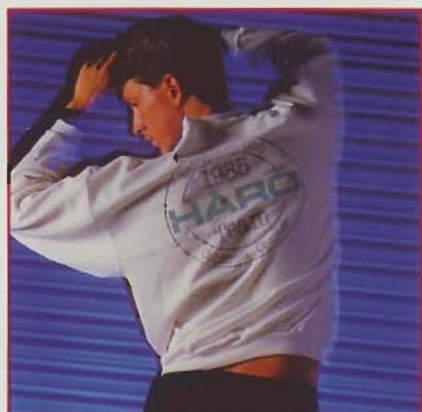

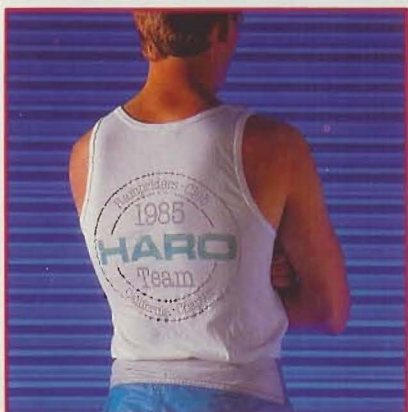

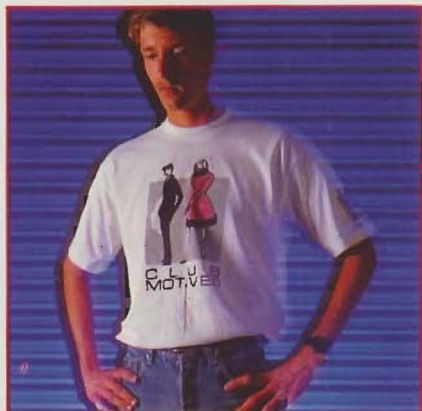

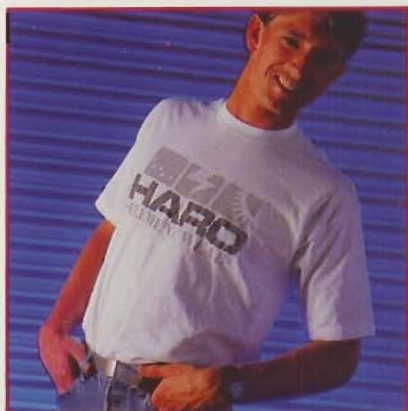

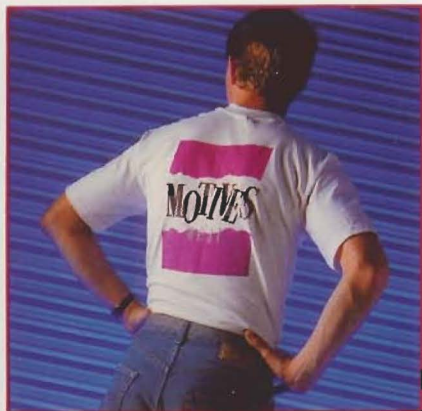

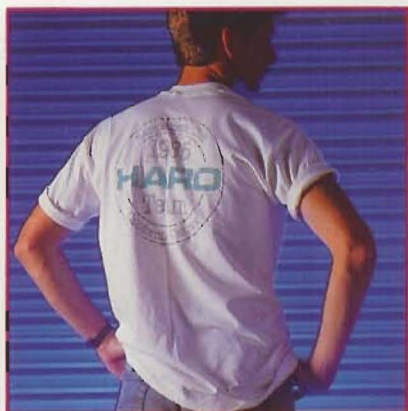

These super light safety pads are made of tough nylon pack cloth stuffed with lightweight foam and fastened with stitched-in Velcro® closures. These stylish stem, V-Bar, 9-inch crossbar, 12-inch frame, jumbo frame and 2-bar twin pad are available in solid colors; blue, black, red and white, with the chevron logo silk screened on them.

## HARO HATS

Haro Hats feature one size fits all adjustability and come in three styles. Blue cloth hat with chevron logo embroidered in front, white polyester hat with ramp rider logo embroidered in front and Motives hat in turquoise/grey and grey/white with Motives logo embroidered in front.

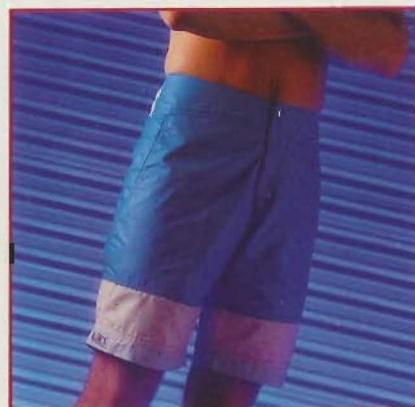

## T-SHIRTS

Up-beat t-shirts designed by Bob Haro. Available in six new styles. All t-shirts constructed of a high quality cotton and some feature the latest craze in lettering and design, puff ink. The new designs are: Ramp Rider, Motives logo, Haro Element Wear, Club Motives and The Cartoon T-shirt. All t-shirts are available in boys' medium through men's large. Tank tops available in white with Ramp Rider logo in puff ink. Men's sizes small, medium and large. Three new crewneck sweatshirts in white with puff ink. Men's sizes small, medium and large.

Haro Designs is now the exclusive distributor for Motives clothing and accessories.

## MOTIVES SHORTS

Longer style shorts by Motives constructed of a tri-blend, nylon/cotton/polyester in bright turquoise blue body and peach/silver strips on bottom of shorts. Side pockets also. Available in sizes 26 through 34, even sizes.

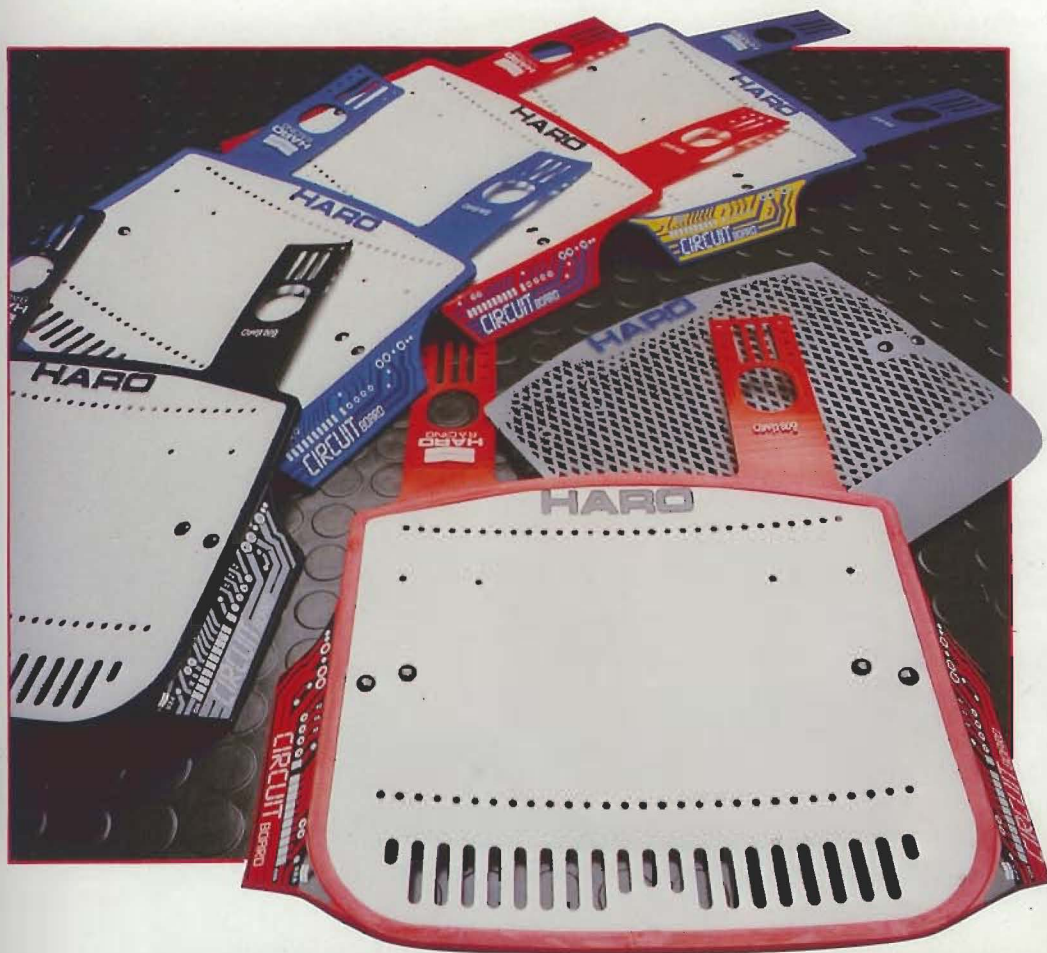

## HARO JACKET

The new Haro lightweight tri-blend jacket constructed of nylon/cotton/polyester is perfect for those cool evenings. Available in turquoise/silver with zipper front, side pockets, elastic waistband and nehru collar. Haro Racing logo embroidered on sleeve. Dress or casual wear. Available in sizes small, medium and large.

# ACCESSORIES

**CIRCUIT BOARD** Over a year in the making. The current state of the art in numberplate design. A three piece plate system that lets you choose between a white solid panel or a vented grid panel. The solid panel is approved for all race sanctioning bodies. Both panels attach with Velcro fasteners and the frame clips onto the molded snaps on the back of each panel. The frame's flexible straps wrap around the crossbar and reattach to the back of the panel with four removable clips. The same clips are also used to attach molded Haro Tech numbers to either panel.

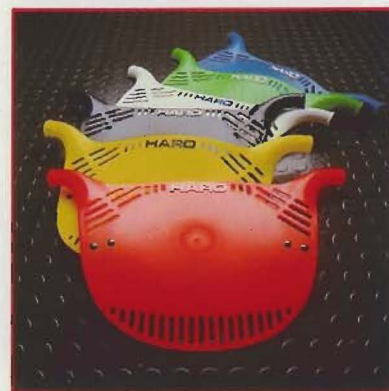

## SERIES 1B

Ready to race with Velcro fasteners, locating holes for the Haro Tech number system and vented lower panel approved by all sanctioning bodies. Six team color combinations with white center panel are available.

## VISORS

Peak or bubble. Bold Haro graphics and quality construction. Introducing the new Haro Aero Visor. This unique design allows air to flow through the visor, creating less wind resistance and a hot new look. Available in five color combinations.

## NEON FLO PANEL

One of the best selling and best looking number plates, the Flo Panel just got better. We changed the colors to ultra-bright neon green, blue, red and yellow. Also in white and black.

**MOUTHGUARD** A mouthguard designed for BMX riders exclusively. Futuristic styling with multiple slots for ventilation and filter foam backing to keep out dust. Tough fiber reinforced straps hold it on and suspend the protective frame away from your face. Five colors with contrasting foam and hot stamp.

**STADIUM NUMBERS AND TECH NUMBERS**

ABA and NBL approved, highly visible adhesive stadium numbers are available in Black with white trim or White with black trim. Tech numbers constructed of plastic are available in black with white trim and come with bullet clips for fastening to plate.

**HARO PATCH**

Look official with a patch by Haro available in cloth (sewn on) or vinyl (adhesive back). Five team colors available.

**HARO FLIGHT BAG / GEAR BAG / DAY PACK**

Gear bags and flight bags are available in a blue durable nylon pack cloth with ultra bold Haro graphics in gray. The flight bag fits a standard 20-inch bicycle for easy air transportation. Small end pocket fits pedals and any other part which might rattle around and scratch your bike. Haro gear bag is designed to hold all your racing products, helmets, shoes, pants etc.
