COLLECTION 22/23

TO BRIGHTEN UP HOMES

Collection 22/23

Collection 22/23 is an ode to design in general; artists, fashion designers and architects are the never-ending sources of our inspiration. We appreciate how a design process takes time and patience. Therefore each product is tested for functionality and its added value. We have established products that are well worth the attention on their own, but will also blend into any home. Based on your personal taste, you can complement your interior with a design item that will amaze you. Thanks to our endless love for vintage furniture and traveling to different places all over the world, we have managed to bring the mix of urban, space age design and natural elements into an all-inclusive collection.

Cities are constantly evolving. The rapid changes and mixed cultures will offer an endless stream of inspiration for artists and designers. In Collection 22/23 you will rediscover existing furniture pieces with a new look, as well as completely new HKliving designs. The vivid colours, bold prints and interesting material combinations will show you that an interior really can handle a bit of spice.

Back to the old days of the 60s and 70s - when lots of things were first invented. Imagine yourself in a time where you could see the first human landing on the moon! A totally new world (literally), opens up in front of you. This introduced us to more daring furniture that did not lose functionality, but became more durable and got a shiny finish. Anything to bring the feeling of a spaceship into your home.

Let the creative minds of our designers and stylists guide you through our lookbook for even more inspiration.

70s ceramics

Oh, take us back to the 70s! Back to when the music was groovy and the interiors were colourful. An era to which we owe many iconic designs. Our signature 70s Ceramics has been extended quite a bit again this collection. Not only will you be amazed by our exciting new colour combinations, but the newly added designs will make the collection even more versatile.

Chef ceramics

High-quality tableware that is made to last. The Chef Ceramic collection consists of the absolute tableware essentials of every kitchen. Supplemented by new finishes and shapes that will lift your kitchen to a more professional level. Let your creativity flow and use tableware that your dinner table truly deserves. The Chef ceramics tableware is made of high-quality, durable porcelain. Due to the reactive glazing technique, each piece is unique and slightly different in shade and colour. Be surprised by the spontaneous patterns and the subtle mix of shiny and matt finishes. By firing the porcelain twice and a third time at a temperature of 1310-1320 Celsius, the chef's ceramics are guaranteed to last and fit perfectly into any horeca establishment.

The inspiration for our new range of dining tables was you, and no one else but you. We have designed dining tables available in three common sizes. Big enough for you and if needed, even the whole family. The bright colours will inspire your creative mind, where the soft nude tones can bring a sense of tranquility. Whatever the choice, you will bring a timeless design item into your home.

A city sometimes makes you long for more greenery and peace. And yet it has something you feel connected to, whether it's the people or the regular places you visit every week. You are part of the city. The way we're able to give colour to a dull concrete environment is perhaps the magic of it all. The vibrant colours in our collection are an ode to street art, where the pieces of furniture allow you to create an interior with a powerful identity.

The new dining chairs are Dutch design and produced in The Netherlands. Something to be extra proud of! Dutch design is known for its innovative and humorous character.

The dining chairs are therefore stackable, supremely comfortable and completely customisable to your taste. With the different frame options and textile colours, you are part of the design process.

From the era where everything was first invented, we not only find new shapes but also exciting material combinations that we still draw inspiration from today. We're talking about the "space age" era. This style revolves around the futuristic designs of the 1960s. People were mesmerised by shiny objects that were such great contrasts to everything that was round and soft. To continue to stay in awe, our new collection is full of chubby shapes, chrome materials and items inspired by the world of outer space.
