

If You Ordered a Raw Brass Fixture

All raw brass will age/darken over time. If you wish to keep your fixture “like new” you can clean it periodically with Brasso. When installing your fixture, **WE DO RECOMMEND WEARING GLOVES**. The raw brass will tarnish if it comes in contact with the oils on your skin. If you ordered a lacquered brass fixture disregard the above message.

Installation Instructions

	<p>Mount the fixture using the 2 provided wall dog screws. These will be either brass or black in color. These screws are designed to go into drywall (if there is a stud behind the drywall it is fine) without the need for additional anchoring. You can place the fixture anywhere on the wall, and it will hold.</p>
	<p>Be sure to check the level of the fixture, then use a drill to attach the fixture to the wall.</p>
	<p>Use the provided allen wrench on the nylon tipped set screw to lock the fixture into the position you want. *Don't over-tighten the set screw* Tighten the screw until it is snug, not tight. You should still be able to swing the fixture from left to right.</p>
