

### **If You Ordered a Raw Brass Fixture**

All raw brass will age/darken over time. If you wish to keep your fixture “like new” you can clean it periodically with Brasso. When installing the globes, **WE DO RECOMMEND WEARING GLOVES**. The raw brass will tarnish if it comes in contact with the oils on your skin.

### **Installation Instructions**

**We recommend a licensed electrician install all electrical fixtures. TURN OFF ALL POWER AND REMOVE OLD FIXTURE.**

	<p>Using holes <b>A</b> and <b>B</b> pictured, screw the 2 - 1 1/2” screws 1/2“ into the back of the provided round mounting plate. The thread of the two screws should be facing you</p>
	<p>Next, attach mounting plate to electrical box with the 2 - 1” screws provided. Preferably with the help of someone to hold fixture, attach the black and white wires of fixture to the corresponding black and white wires in the electrical box. The bare copper grounding wire connects to the green grounding wire in the electrical box.</p>
	<p>Tuck wires into electrical box and line up the screws to the holes near the socket.</p>
	<p>Finally, screw the acorn nuts onto the screw. Turn until fixture tightens firmly to the wall.</p>
