

## sake

Welcome to one of the largest sake collections in Colorado. Hapa would like you to experience the world of sake!

People have been enjoying sake for almost 7,000 years. Sake making implements have been discovered in the Yangtze River Valley in China dating back to 4,800 B.C., approximately the time that nomadic people settled down.

Sake is one of the most natural beverages on earth. It is made from only rice, water, yeast and koji-kin. It has an alcohol content of approximately 15%, about that of wine.

Like wine, sake comes in many different styles.

**JUNMAI** Sake brewed using only rice, water, koji and yeast. The name means “pure rice”.

**HONJOZO** Sake made from rice polished to the extent that 30% of the grain has been ground away with a tad of distilled alcohol added.

**GINJO** Sake made from rice polished to the extent that 40% of the grain has been ground away.

**DAIGINJO** Sake made from rice polished to 50% of its original size.

**NIGORI** Unfiltered sake.

Whether you are new to sake, or just want a little variety, you may now order a flight of four of our fine sakes.

Please ask your server to help you find your preference.

Nihonshu-do, also known as Sake Meter Value, is a scale used to measure the sweetness of sake. The scale moves from very sweet to very dry and is a good starting point for flavor profile.

## sake

### HAPA INFUSED SAKE

A style of sake unique to Hapa. We take premium sake and infuse it with different fruits, allowing the sake to absorb the full flavor of the fruit. Our infused sakes are served cold, have a bold taste, and are refreshing and flavorful. Hapa uses organic fruit in all of our infusions!

	Glass   Masu   Flask		
	2oz	7oz	15oz
Raspberry Infused Sake	6	9	18
Mango Infused Nigori Sake	6	9	18
