## Hours of Operation

If you are trying to reach us after hours please leave us a message, write us an email, or send us a fax and we will get back to you A.S.A.P.

Hours of Operation	Opening Times (E.S.T.)	Closing Time (E.S.T.)
Monday - Thursday	8:15	5:15
Friday	8:15	4:00
Saturday/Sunday	Closed	Closed

**All Orders** To ensure that your order is processed correctly and promptly, please have all information: name address (including street number and postal code), and phone number in case we need to contact you. Please also include method of payment and any special shipping instructions. Please use catalogue numbers or website numbers wherever possible. When mailing in your order we ask that it is either typed or printed clearly, to ensure that we send you the correct product.

**Special Order Items** Special Order items are items we do not readily stock but are made available to you through special order. Special Order Items are not returnable. Special Order Items may require partial or full prepayment.

**Back Orders** Regardless of how you order, we will process your order into our system A.S.A.P. We ship all items that are in stock within 48 hours of receipt of order. Items that are out of stock, at the time your order is processed, will be back ordered. We stock well over 1,000,000 items and strive to keep back orders to a minimum. Back Orders, valued above \$20, weighing less than 3kg will be shipped out free of charge. Back Orders larger than 3kg will be charged for additional shipping. Back orders are not available for overseas shipments.

**Payment** For payment within Canada, we accept Visa, MasterCard, C.O.D. Please be advised that cheques, upon receipt, take 15 days to clear and your shipment will not be released until it has been cleared. Please accommodate for this clearance time. We do not recommend that you send cash via mail, and we are not responsible for any cash payments that are lost in the mail. For International Payments (including USA), we accept Visa and MasterCard only.

**Shipping** We take pride in not only offering you the best products available, but also in being able to process your order as quickly as possible. Depending on the contents of your order, the weight, and your location, we ship using either Canada Post or UPS. International Shipments are shipped using Canada Post only. Our customers are responsible for shipping charges. Rest assured that you are receiving our preferred customer rates, and we are proud to say that we offer very competitive pricing for shipping. Please note that **when shipping with UPS your Ship to Name must be the name that is displayed on your store sign**. If this does not apply to you, and you are residential, please let us know. Failure to do so will result in your shipment being returned to Perrin's. In order to re-process your order, a return fee of \$10.00 will be added to your invoice, as well as the additional shipping fee for the second delivery attempt.

**Insurance** In a situation where bezels and watches have been sent, insurance costs will be added at a rate that we deem sufficient and will require a signature upon delivery. If you would like certain items to have adequate insurance coverage, you may specify the value of such items for insurance purposes, and we will cover them for those amounts. We will only be liable for the insured value of the parcel or shipment. All deliveries with a value of \$100+ require signatures.

## MINERAL BLANKS

These round blanks are ideally suited to be used with the crystal cutting machine. We prefer using round blanks versus square blanks due to the fact that square blanks crack quickly, where the round blanks survive the cutting process.

### FLAT MINERAL ROUND BLANKS

#### 0.70 mm Thick Flat Mineral Round Blanks, sold individually

CR-BL70150 – 15.00 mm diameter  
 CR-BL70200 – 20.00 mm diameter  
 CR-BL70250 – 25.00 mm diameter  
 CR-BL70300 – 30.00 mm diameter  
 CR-BL70350 – 35.00 mm diameter  
 CR-BL70400 – 40.00 mm diameter

#### 0.90 mm Thick Flat Mineral Round Blanks, sold individually

CR-BL90150 – 15.00 mm diameter  
 CR-BL90200 – 20.00 mm diameter  
 CR-BL90250 – 25.00 mm diameter  
 CR-BL90300 – 30.00 mm diameter  
 CR-BL90350 – 35.00 mm diameter  
 CR-BL90400 – 40.00 mm diameter  
 CR-BL90450 – 45.00 mm diameter  
 CR-BL90500 – 50.00 mm diameter

### **1.10 mm Thick Flat Mineral Round Blanks, sold individually**

CR-BL110150 – 15.00 mm diameter  
CR-BL110200 – 20.00 mm diameter  
CR-BL110250 – 25.00 mm diameter  
CR-BL110300 – 30.00 mm diameter  
CR-BL110350 – 35.00 mm diameter  
CR-BL110400 – 40.00 mm diameter  
CR-BL110450 – 45.00 mm diameter  
CR-BL110500 – 50.00 mm diameter

### **1.30 mm Thick Flat Mineral Round Blanks, sold individually**

CR-BL130300 – 30.00 mm diameter  
CR-BL130350 – 35.00 mm diameter  
CR-BL130400 – 40.00 mm diameter  
CR-BL130450 – 45.00 mm diameter

### **1.50 mm Thick Flat Mineral Round Blanks, sold individually**

CR-BL150300 – 30.00 mm diameter  
CR-BL150400 – 40.00 mm diameter  
CR-BL150500 – 50.00 mm diameter

### **1.80 mm Thick Flat Mineral Round Blanks, sold individually**

CR-BL180300 – 30.00 mm diameter  
CR-BL180400 – 40.00 mm diameter

### **2.00 mm Thick Flat Mineral Round Blanks, sold individually**

CR-BL200300 – 30.00 mm diameter  
CR-BL200400 – 40.00 mm diameter  
CR-BL200500 – 50.00 mm diameter

### **2.50 mm Thick Flat Mineral Round Blanks, sold individually**

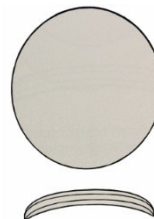

CR-BL250300 – 30.00 mm diameter  
CR-BL250400 – 40.00 mm diameter  
CR-BL250500 – 50.00 mm diameter

### **3.00 mm Thick Flat Mineral Round Blanks, sold individually**

CR-BL300300 – 30.00 mm diameter  
CR-BL300400 – 40.00 mm diameter

## **ROUND DOMED MINERAL GLASS BLANKS, sold individually**

CR-DBL100400 – 40.00 mm diameter 1.00 mm thick  
CR-DBL130400 – 40.00 mm diameter 1.30 mm thick  
CR-DBL150400 – 40.00 mm diameter 1.50 mm thick  
CR-DBL200400 – 44.00 mm diameter 2.00 mm thick

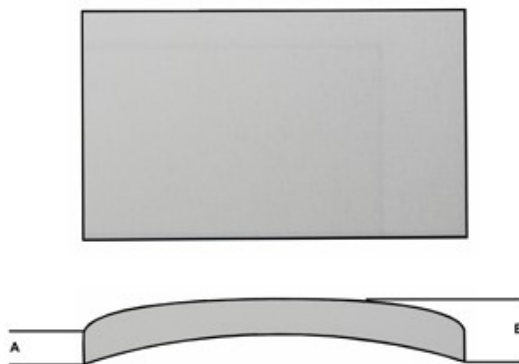

## **FLAT SQUARE MINERAL GLASS BLANKS, sold individually**

**CR-FBL70400** – 40.00 mm x 40.00 mm x 0.70 mm  
**CR-FBL80400** – 40.00 mm x 40.00 mm x 0.80 mm  
**CR-FBL801000** – 100.00 mm x 100.00 mm x 0.80 mm  
**CR-FBL901000** – 100.00 mm x 100.00 mm x 0.90 mm  
**CR-FBL100400** – 40.00 mm x 40.00 mm x 1.00 mm  
**CR-FBL1001000** – 100.00 mm x 100.00 mm x 1.00 mm  
**CR-FBL130400** – 40.00 mm x 40.00 mm x 1.30 mm  
**CR-FBL1301000** – 100.00 mm x 100.00 mm x 1.30 mm  
**CR-FBL1401000** – 100.00 mm x 100.00 mm x 1.40 mm  
**CR-FBL1501000** – 100.00 mm x 100.00 mm x 1.50 mm  
**CR-FBL200400** – 40.00 mm x 40.00 mm x 2.00 mm  
**CR-FBL2501000** – 100.00 mm x 100.00 mm x 2.50 mm

## **CURVED RECTANGULAR MINERAL GLASS BLANKS**

Curved Rectangular Crystals have different RADIUS. The lower the number for the radius the more substantial a curve, the higher the number for the radius the lower a curve. Height at center approximate, measurements may vary.

### **Radius 30 Curved Rectangular Mineral Glass Blanks, sold individually**

**CR-CBL221630** – 22.00 mm x 16.00 mm x 1.00 mm (A), 3.40 mm (B)  
**CR-CBL302030** – 30.00 mm x 20.00 mm x 1.00 mm (A), 4.60 mm (B)  
**CR-CBL352530** – 35.00 mm x 25.00 mm x 1.00 mm (A), 5.90 mm (B)  
**CR-CBL372830** – 37.00 mm x 28.00 mm x 1.00 mm (A), 6.80 mm (B)

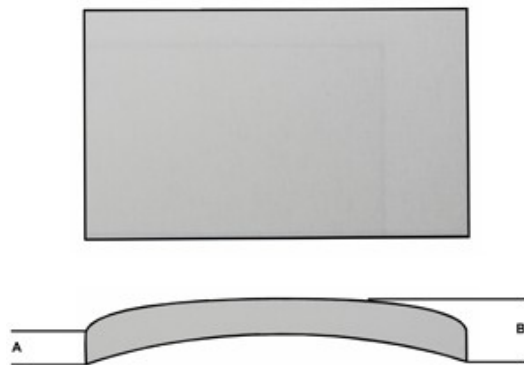

### **Radius 40 Curved Rectangular Mineral Glass Blanks, sold individually**

**CR-CBL221640** – 22.00 mm x 16.00 mm x 1.00 mm (A), 2.50 mm (B)  
**CR-CBL302040** – 30.00 mm x 20.00 mm x 1.00 mm (A), 3.90 mm (B)  
**CR-CBL352540** – 35.00 mm x 25.00 mm x 1.00 mm (A), 4.80 mm (B)  
**CR-CBL372840** – 37.00 mm x 28.00 mm x 1.00 mm (A), 5.40 mm (B)  
**CR-CBL403040** – 40.00 mm x 30.00 mm x 1.00 mm (A), 6.35 mm (B)  
**CR-CBL40304015** – 40.00 mm x 30.00 mm x 1.50 mm (A), 6.85 mm (B)

### **Radius 45 Curved Rectangular Mineral Glass Blanks, sold individually**

**CR-CBL403045** – 40.00 mm x 30.00 mm x 1.50 mm (A), 6.20 mm (B)

### **Radius 50 Curved Rectangular Mineral Glass Blanks, sold individually**

CR-CBL221650 – 22.00 mm x 16.00 mm x 1.00 mm (A), 2.50 mm (B)

CR-CBL302050 – 30.00 mm x 20.00 mm x 1.00 mm (A), 3.25 mm (B)

## Rolex® Parabolic

**Generic RLX Sapphire Parabolic Crystal.** These generic parabolic sapphire crystals allow the watchmaker the ability to replace traditional Rolex® plastic crystals with sapphire crystals. These parabolic sapphire crystals are flat on the top, domed on the bottom to permit clearance for the watch hands. This gives the option to the owner of the watch to have the durability of a Sapphire crystal. All Parabolic crystals are sold with a gasket included

# CRYSTAL FITTING TOOLS AND SUPPLIES

## Crystal Cementing:

For mineral, glass, and sapphire:

1. **# 12-207** Ultraviolet cement (recommended). This is the ideal cement for gluing mineral crystals to watch cases, or for gluing broken crystal, or broken glass. Dries crystal clear. Use with Ultraviolet Light #12-209 (or can cure in sunlight). 
2. **# 67-26535** Loctite “350” Ultraviolet Glue. Loctite 350 is a medium viscosity adhesive that forms tough, flexible bonds with excellent adhesion to glass and metals. Strength retention is excellent when exposed to water or humidity. The product has a long open working time, making it ideal for fitting mineral or sapphire crystals. Use with Ultraviolet Light #12-209. Cure rate and depth of cure will depend upon light intensity, light source. Cures crystal clear. 50ml bottle. Not recommended for gluing plastic crystals. 
  - 1a. **# 12-209** Ultraviolet Lamp. Specialized plug-in lamp (electric) used to cure the Ultraviolet Glue. Items being glued can be placed under the lamp for hands free operation. Highly recommended when using UV-glue # 12-207 or 67-26535. 
  - 1b. **# 12-207BLB** Replacement UV Bulb 
3. **# 12-0451** Vigor Jewelers 2-part Epoxy (combine a resin and a hardener). Will not shrink and is unaffected by water, oil or gasoline. Clear, permanent bond sets in 5 minutes. Withstands temperatures up to 175 C. 
4. **# 12-210** Epoxy 330 (combine a resin and a hardener) is a water clear epoxy system. Epoxy 330 has a fast-setting time. Will harden in about 1 hour at room temperature and in about 10 minutes under a heat lamp. 
5. **# 12-219** 2-gram tube Vigor Super glue. 10/20 series has a setting time of 10 to 20 seconds. Strong cyanoacrylate adhesive bonds any combination of metal, plastic, ceramic, or glass. Sets and cures rapidly at room temperature. Requires no surface treatment beyond cleaning. High resistance to chemicals and low temperature. Bond is colourless and transparent with almost no shrinkage. Low viscosity ensures smooth spreading over entire bonding area using a minimum amount of glue.

## For plastic, and acrylic:

1. **# 12-205** G-S Hypo-Tube Cement (recommended). Unique precision applicator and pinpoint tip. Bonds in approximately 30 minutes allowing parts to be positioned before setting. Ideally suited for plastics, not recommended for glass. Ideally recommended for cementing plastic watch crystals. Net 1/3 fl oz. 
2. **# 12-206** SUC – Rocket Cylinder Cement (recommended). Specially made tube cement for cementing and dustproofing unbreakable (plastic) watch crystals. 
3. **# 12-0451** Vigor Jewelers Epoxy (combine a resin and a hardener). Will not shrink and is unaffected by water, oil or gasoline. Clear, permanent bond sets in 5 minutes. Withstands temperatures up to 175 C. 
4. **# 12-210** Epoxy 330 (combine a resin and a hardener) is a water clear epoxy system. Epoxy 330 has a fast-setting time. Will harden in about 1 hour at room temperature and in about 10 minutes under a heat lamp. 

## Removing Cemented Crystals:

To remove mineral glass, and sapphire from a metal (non-plated) case

1. Use heat – consider a mini torch like # 14-212 or # 14-214. Push out the glass, and then gently scrape out the remaining debris.
  - 1a. **# 14-212** Micro Torch. Electronic, instant ignition torch requires only one hand to ignite and adjust the flame. The easy, thumb-adjustable gas/flow lever allows precision flame corrections. Approximate burn time is 90 minutes. 
  - 1b. **# 14-214** Micro Torch – Econo Model. Electronic instant-ignition system for push-button start-ups. Both flame and temperature can be adjusted precisely. Provides up to 90 minutes of burn time before refill is required. High temperature flame of 2500F (1371C). Uses butane only, not included. 
  - 1c. **# 14-220** Butane fuel for Micro Torch. Ultra-refined butane fuel specifically geared for use with Micro Torch. Special, non-clogging formula allows extended use. Includes a single piece, universal tip. 5 1/8 fl oz can. 
2. **# 38-325** ATTACK glue dissolving compound. Dissolves cured epoxy and polyester resins so you can quickly and easily separate misaligned materials, or clean cured resins from metal, stone, glass, wood and many other materials - 8 oz can 

To remove plastic, or acrylic – first push out the crystal (use a crystal press if necessary, then gently scrape out the remaining debris. Note – you can use a mini-torch as above – but *very lightly!*

## Crystal Polishing:

To polish mineral or glass after cutting: (note – you can only polish the edges after cutting – you will not be able to remove surface scratches)

1. **# 17-436** Solid felt wheel buff (you will need a polishing motor to use this). Tightly compressed wool felt creates a medium wheel for all-purpose polishing and buffing – 4” diameter, 3/4” thick – with a pin hole in the centre.
2. **# 47-403** Golden Glo medium, bulk polishing rouge. For adding a high lustre and color to gold. (also great for watch glass!)

To polish plastic, or acrylic: (note – you can polish the sides, and edges, and also remove surface scratches).

1. **# 17-581** Regular muslin buff with Shellac centre (you’ll need a polishing motor to use this) – 4” diameter, with 42 ply, and 3 rows of stitching – use with abrasive compounds to remove scratches.
2. **# 47-310** C-Clear Plastic Renewer compound. Each watch repair can have a crystal that looks brand new. Easy to use, charge buffing wheel with compound and crystal is then gently buffed. 1/4 lb. bar.

3. **# 47-001** Polywatch Scratch Remover. Removes scratches from plastic watch crystals. Apply a small amount of Polywatch to the crystal and polish with a cotton cloth. The scratches will disappear, and the surface of the crystal will look as good as new.

4. **# 67-26499** Polywatch for Mineral Crystals. High-performance diamond polish and scratch remover for glass. It removes fine, light and medium deep scratches for watch glasses. The contents are sufficient for approx. 30 to 40 applications. All inclusive kit contains: 1 repair #1, 1 finish #2, 1 polishing rod, 2 sets of 6 polishing strips.

## Crystal Presses and Dies

We have a full range of crystal presses. In many instances a watch press to close case backs is also used as a press to install watch crystals. It is just a matter of putting the watch in the press with the dial face down or the watch back down. As always, the better tools do cost a little more, however the value of a good tool is that you minimize the risk of damaging a customer's watch.

1. **# 59-0795A** Economy Watch Case Press with Aluminum Dies. Used for fitting watch case backs as well as watch crystals. This is a widely used economy version of the standard watch case/crystal press. Sturdy metal press makes battery changing easy for anyone by making case closing easy. Press comes complete with 14 double sided straight wall aluminum dies sizes 16.00 mm to 40.00 mm, with matching anvil stakes. Of the three economy versions of press, the advantage with this press is the complete range of dies supplied with the press. The other "economy" presses offer a smaller range of dies.
  - 1a. **# 59-0796** Set of 6 oversize cupped aluminum reversible dies for 59-0795A 45/47 50/53 54/55 56/57 58/60 62/64
  - 1b. **# 59-0797** Set of 6 oversize aluminum dies for 59-0795A - reversible cupped dies 43/45 46/50 54/56 57/65, reversible flat dies 35/40 45/50
  - 1c. **# 59-0795D** Complete set of replacement dies for 59-0795A – same as what originally comes with the press.

2. **# 59-0798** Economy Watch Case Press with 12 Nylon Dies. Used for fitting watch case backs as well as watch crystals. Case press is made of metal, included is an assortment of nylon dies that snap on and off quickly. The nylon dies eliminate the danger of scratching or marring watch cases or watch crystals.
  - 2a. **# 59-0798B** Set of 8 Oversize nylon dies for 59-0798 - Flat dies 35 40 45 - Reversible cupped dies 40/42.5 45/47.5 50/52.5 54/55 56/57
  - 2b. **# 59-0798D** Set of 12 reversible nylon dies for 59-0798 - cupped 21/22 27/28 31/32 33/34 35/36 39/40 - flat 24/25 26/27 28/29 30/31 32/33 36/37
  - 2c. **# 59-0798S** Set of 5 nylon square dies for 59-0798 – die widths 16, 18, 20, 22 25mm

**59-0798D**

**59-0798B**

**59-0798S**

3. **# 67-7131** Horotec Press. This press is suited for both SCREW-ON and SNAP-ON dies. Supplied with 12 Delrin screw on dies, with a diameter range of 17 mm to 55 mm. This wide range of diameters will cover the majority of your crystal fitting needs. Dimensions 110 mm x 95 mm x 210 mm.
4. **# 67-6135** Horotec Standard Press. This standard press is built to last. The handle is designed to fit very nicely in your hand, allowing you comfort and maximum strength for fitting watch crystals or case backs. The press is sold separately, and you can purchase the dies to best suit your repair requirements. This press is the "new kid" on the block. Its construction is robust; this is a tool that will last for years.

5. **# 67-6150** Horotec Deluxe Crystal Press. This Deluxe press has a screwing system with blocking lever that is designed to avoid damage to watch cases. Some watch cases require considerable pressure to either fit a watch glass or to close the case. The blocking lever on this press allows you to apply pressure by squeezing the handle and locking it in place. The final pressure can then be attained by turning the wheel on the top of the press. This allows you to control exactly the amount of pressure being applied to the watch case, thus avoiding the chance of inadvertently damaging a watch case. The press is sold separately, and you can purchase the dies to best suit your repair requirements.

6. **# 67-6152** Horotec Deluxe Crystal Press Complete. Contains the 67-6150 Horotec Deluxe Crystal Press, supplied in a wooden case with 2 drawers containing 48 delrin snap on dies. The delrin dies include 20 dies for fitting tension ring crystals, 12 dies for fitting watch case bezels, 10 dies for fitting mineral crystals, and 6 dies for closing snap on watch case backs. This is the most complete set available, organized, and ready to use for every application.

Accessories for the Horotec Standard, Deluxe, Micro, and Speed Presses. Over the last few years Horotec has modified their crystal and case presses. The older models take dies with a hole that fit with friction. The newer models take dies with a threaded brass bushing and must be threaded on. Please be careful when ordering.

## Bergeon Swiss Made Crystal Presses

1. # **64-5500A** Complete press for fitting watch crystals and case backs. Bergeon has been the industry standard for years. This complete press consists of 1 press, a set of 12 reversible duraluminium dies, a set of 9 lower reversible dies, 1 universal lower die, 1 support number 64-5500-T28. This is a die cast alloy press, matt chromed finish with an opening in the base to allow you to leave metal bands on the watch case when using the press. This is a quality press designed to last for years. Supplied with a wooden base to organize both dies and press for easy operation.

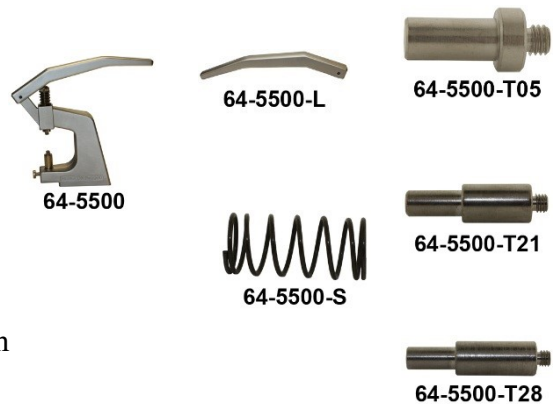

2. # **64-5500C** Reduced version watch crystal and case back press. This is exactly the same quality press as 64-5500A, the difference is the reduced number of dies. This set consists of 1 press, a set of 9 dies and 1 lower die. Supplied with a wooden base to organize both dies and press for easy operation.

3. # **64-6173** Heavy duty watch crystal and case back press. This "rack-press" allows you maximum strength and pressure when fitting all types of watch crystals, bezels, rotating bezels and snap-back watch case backs. This press is not supplied with any dies, but will accept all Bergeon dies, and many of the "Horotec" dies.
