email your orders to [sales@perrin.ca](mailto:sales@perrin.ca)

To our valued customers:

In 1911, Herman Perrin travelled to Canada from Switzerland to head up the watch repair department of 50 watchmakers for Eatons. Soon after, he began to import and sell balance staffs, mainsprings and crowns for watches, which lead Herman to the importing of other watch parts. In 1929, Herman was joined by his nephew Willian and H. & W. Perrin Co Ltd was formed.

From humble beginnings, PERRIN's has grown to what is today one of Canada's leading watch material houses. Perrin's is a complete service supplier of tools, equipment and supplies for watch and clock makers, jewellers , opticians and fine technicians.

With 100 years of hisotry behind the PERRIN name, we continue to pride ourselves on fast dependable service. Your order leaves our premises the day it is received, we maintain a multitude of "in stock" products, so that we may better serve your needs. Our experienced, knowleadgeable staff are always ready to help.

We thank you for your valued business and hope to continue as your supplier today and in the future.

## INDEX

**TECHNICAL INFORMATION**

**Weights & Measures**

24 grains = 1 pennyweight (dwt.)  
 20 dwt = 1 ounce Troy  
 12 ounces = 1 pound Troy  
 5760 grains = 1 pound Troy  
 480 grains = 1 Troy oz.  
 1 kilogram (kg) = 2.2046 pounds (lbs)  
 1 kilogram = 32.15 Troy oz.

**Millimeters, Centimeters & Inches**

1" (inch) = 2.54cm  
 1" (inch) = 25.4mm

**Gold KT Fineness Chart**

Karat Fineness  
 10kt = 0.417  
 14kt = 0.58500  
 18kt = 0.75000  
 20kt = 0.83340  
 22kt = 0.91674  
 24kt = 0.999

**Carat & Points**

1 carat = 100 points  
 1/2 carat = 50 points  
 1/4 carat = 25 points  
 1/8 carat = 12 1/2 points

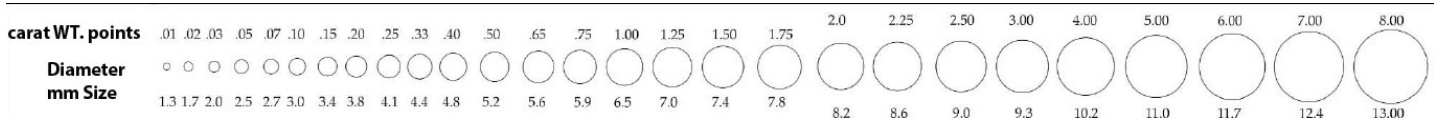

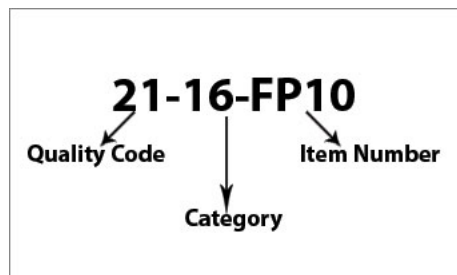

**Birth Stones**

Months	Colours
January	Garnet
February	Amethyst
March	Aquamarine
April	Diamond
May	Emerald
June	Pearl / Alexandrite
July	Ruby
August	Peridot
September	Sapphire
October	Tourmaline / Opal
November	Topaz / Citrine
December	Tanzanite / Zircon / Turquoise

**Abbreviations**

KT = karat  
 YGF = yellow gold filled  
 WGF = white gold filled  
 YGP = yellow gold plated  
 NP = nickel plated  
 NF = nickel free  
 LF = lead free  
 CL = colour  
 DIA = diameter  
 UOM = unit of measure

**Decipher Our Item Numbers**

Note: Carat Weight to MIM Diameter is Approximate.

**ONYX RING INITIALS**

**10kt Yellow Large Onyx Ring Initials with Screws**

Onyx ring initials are supplied with tube and screws for onyx rings.

# BEAD CORD & WIRE

## Nylon Cord Carded

This is the finest tight-woven nylon cord. 2 meters (6.5 feet) of brilliantly, color-fast cord per card with needle attached. Simply take the needle from the card and off you go! The twisted stainless steel needle saves the threading time. Doubling the thread is not necessary.

	Size								
Cord Colour	#1 (0.35 mm)	#1.5 (0.40 mm)	#2 (0.45 mm)	#3 (0.50 mm)	#4 (0.60 mm)	#5 (0.65 mm)	#6 (0.70 mm)	#8 (0.80 mm)	#12 (0.96 mm)

Purple	68-660	68-661	68-662	68-663

## 1 mm Hemp Cord Carded Sets

This genuine hemp cord is a BeadCraft product. Each set is supplied with 4 different colours, 30 feet per colour. 2 Different set are available

- # 68-475 | BLACK, WHITE BROWN TAN
- # 68-476 | BLACK, COFFEE, BROWN, TAN

## Elastic Stretch Cord Flat Spool

This elastic stretch cord is great for making stretch jewellery. It provides the perfect elasticity without snapping or losing its form. Available in a variety of colours, sizes and lengths.

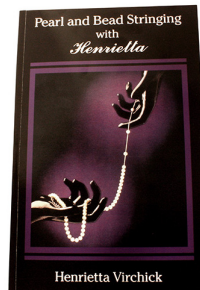

Cord Colour	Cord Size	25 Meter Roll	100 Meter Roll
Clear	0.5 mm	68-120	68-123
Clear	0.8 mm	68-121	68-124
Clear	1.00 mm	68-122	68-125
Black	0.5 mm	38-45002	
Black	0.8 mm	38-45502	
Black	1.00 mm	38-46002	

## Bead Needles

Used with spooled cord when beading. Pass the thread through the eye of the bead needle (like a sewing needle), to aid when threading beads, pearls stones etc. They are available in stainless steel and brass. Brass is softer and stainless is rigid. Needles are approx. 3" in length.

Item #	Material	Size	# Needles Per Package
38-0907	brass	fine #6	50
38-0911	steel	fine #6	50
38-0908	brass	medium #8	50
38-0912	steel	medium #8	25
38-0909	brass	coarse #10	50
38-0913	steel	coarse #10	50

## PEARL & BEAD STRINGING WITH HENRIETTA # 62-01453

This soft cover book is a must for those attempting the art of bead stringing. It covers techniques for knotting and stringing beads. Ideal for beginners and more advanced.

## Helpful Tools for Beading

## GS HYPO CEMENT # 12-205

This hypo cement is to be used when beading. You can use this glue on jewellery wire and for fusing knots on monofilament.

## SUPERIOR BEADER'S TOOL KIT # 38-40509

This tool kit offers all the essential tools for beading or wire work, packed in a compact leatherette case. This set is perfect for keeping your space organized and clutter free.

### The set contains:

- Original bead crimping pliers
- Knot cutter
- Nylon jaw pliers
- #5 knotting tweezers
- Wire rounder
- Split ring tweezers
- Chain nose pliers
- Side cutter
- Round nose plier

## PROFESSIONAL PEARL AND BEAD STRINGING KIT # 38-42100

This extensive kit includes items specifically needed for stringing and knotting for the experienced and professional level. The following tools and supplies come with a durable canvas tote.

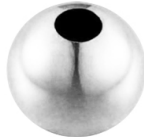

### The kit contains:

- Original bead crimping pliers
- Flocked bead board
- Flush cutters
- Knotting tool with DVD
- Deluxe bead reamer set
- Silk thread assortment
- 100 sterling silver crimps
- Stringing instruction book
- Chain nose pliers
- Flat nose pliers
- Round nose pliers
- Pearl /bead tweezers
- Beeswax
- Thread scissors
- Brass mm gauge
- Stringing needles
- Jewellers cement
- Plastic organizer

**BEADS**

Perrin Offers a variety of styles, shapes, sizes and qualities of beads. Beads can be used on any necklace or bracelet. Use them in your designs for pearl necklaces and other beaded necklaces. Choose from Our selection of Smooth Beads, Corrugated Beads and Sparkle Beads.

## Bead Bumpers

**0.5mm CLEAR**

# 60-05-9800 | PKG OF 50

**0.5mm WHITE**

# 60-05-9801 | PKG OF 50

*Bead Bumpers are mini stretch beads that create the illusion of nuts between beads. They act as a cushion between crystals and glass bead. They can also be used to hold beads in place on wire and jewellery findings.*

## CHAIN ENDS

The chain end allows the jeweller to have an ending on which a jump ring and or clasp can be attached thus allowing proper closure. Our chain ends are made to be bent and pinched (adapted to the particular style) of chain in order to create a "ring" type end to the chain. These chain ends must be soldered to the chain. Different widths are available in order to match to the chain width on which the chain end is to be attached. For example, 6mm chain end is to be attached (soldered) to a 6mm wide chain or may be adapted to fit a chain close to 6mm or narrower.

With quality in mind, our chain ends are manufactured in Italy. They are available in a variety of sizes and metal qualities.

## CUFFLINK BACKS

Design your own Cufflink with easy to use cufflink backs. Cufflinks that have a pad are easy to decorate with glue. Cufflinks that feature a rivet and a joint, soldering is required. We recommend soldering the joint to the item you are turning into a cufflink. Quick tip: any finding that has an action controlled by a spring, if you solder the spring in place the heat will soften the spring affecting the action of the spring.

## "The Spring" Ring Guards

These are special ring guards with a spring on the inside. This allows the ring guard to float over an enlarged knuckle and then spring back into place to ensure a snug fitting ring.

### THE SPRING RING GUARD ASSORTMENT

# 51-61-400 | YGF

The spring ring guard assortment contains 1 each of ygf and wgf from 2mm to 5mm, a total of 12 pieces.

### 2mm RINGS GUARDS

# 51-61-420 | YGF

# 52-61-420 | WGF

- # 12-61-AR3W | 14KT WHITE | 2.0mm
- # 12-61-AR5W | 14KT WHITE | 2.75mm
- # 12-61-AR7W | 14KT WHITE | 3.6mm
- # 12-61-AR10 | 14KT WHITE | ASSORTMENT

**ASSEMBLY INSTRUCTIONS**

1. Size ring 3/4 size large than knuckle size.
2. Use hard solder for sizing joint.
3. Emery and polish inside of ring.
4. Bend spring guard into a horseshoe shape to fit inside of ring. Ends of spring should be bent to the outside to avoid scraping finger when putting ring on and taking ring off.
5. Use easy solder when soldering spring guard in place.
6. Allow ring to air cool after soldering. Do not quench.

**FingerFit Arthritic Shanks**

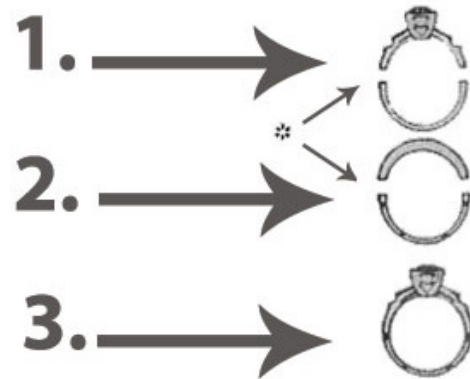

For those hard to fit rings caused by large arthritic knuckles. This shank provides your customer with a comfortable fitting ring.

FINGER FIT means customer satisfaction. It opens 3 sizes larger to go over larger knuckles, then locks the ring securely in place.

Step 1: Shape to desired finger size. Remove conventional shank.

Step 2: Remove necessary amount from top of FINGER FIT shank to complete finger size.

Step 3: Solder the FINGER FIT shank in place. Emery to match shape of shank.

Ring size listed is size when closed.

**REDI-PRONG**

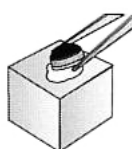

With Redi-Prong you can re-tip prongs with ease and efficiency. Redi-Prong saves the professional jeweler time and frustration! Redi-prongs are precision sized pieces of precious metal with pre-applied flux that makes the job of re-tipping prongs on diamonds quicker and easier. Redi-prongs are available in a variety of shapes and sizes, round baguette, channel, princess, v-prong and tapered. Original redi-prongs are made with pre-applied flux for torch work.

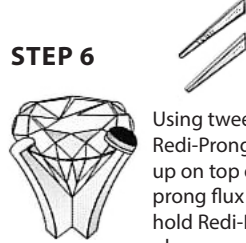

**STEP 1**  Select Redi-Prong size that closely matches the size of the prongs to be re-tipped.

**STEP 2**  Apply a combined even mixture of boric acid and alcohol to ring to be re-tipped.

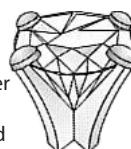

**STEP 3**  Ignite mixture so protective coating of boric acid is burned onto ring.

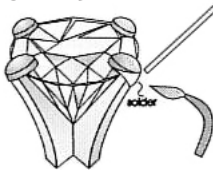

**STEP 4**  Apply a small thin layer of flux to bench block or ceramic bench palette.

**STEP 5**  With inked side up, apply flux to bottom of Redi-Prong by holding it in tweezers and dabbing the Redi-Prong in thin layer of flux on bench block.

**STEP 6**  Using tweezers set Redi-Prong inked side up on top of worn prong flux will help hold Redi-Prong in place.

**STEP 7**  Use a small flame to direct heat on worn prong until the solder on bottom of the Redi-Prong flows and adheres it to the warm prong.

**STEP 8**  Apply Redi-Prongs to remaining worn prongs and repeat steps 5 to 7.

**STEP 9**  If needed, flow a small drop of gold solder to back edge of the prong to blend old prong to the new Redi-Prong. Repeat for each.

**STEP 10**  Trim prongs: Use a small fine tooth file or cup burr to smooth into proper shape.

**STEP 11**  Polish ring using standard method. Complete by cleaning using an ultrasonic and steamer. Inspect finished ring.

## SOLDER

We offer an extensive line of KROHN solders. These solders are produced under exacting quality controls to ensure karat, composition and melt and flow points. The guaranteed uniformity provides the jewellery manufacturer with dependable, trouble-free soldering and high quality finished products.

### Clipped Solder

Item #	Clipped Solder	Extra	Flow Point °F(°C)
13-72-K10YC	10 Yellow Repair - 1 dwt vial - cut square 0.040" 0.040" (1 x 1mm)	-	1300(705)
13-72-K14YC	14 Yellow Repair - 1 dwt vial - cut square 0.040" 0.040" (1 x 1mm)	-	1240(671)

*CIF means it's Cadmium and Indium Free!*

### Syringe Solder- Krohn

This paste solder comes pre-mixed with flux. It is ideal for fine jewellery repairs such as fine chains. Gold Solders are supplied in 1 dwt and silver solders are supplied in 1/2 Troy oz.

Item #	Syringe Solder	Extra	Flow Point °F(°C)
13-72-9408	10KY hard plumb gold paste solder in Syringes of 1 DWT	-	1380(749)
13-72-9409	10W easy repair gold paste solder in Syringes of 1 DWT	CIF	1270(688)
13-72-9410	10Y easy repair gold paste solder in Syringes of 1 DWT	-	1245(674)
13-72-9412	14Y easy repair gold paste solder in Syringes of 1 DWT	-	1290(699)

**CRIMPS**

We offer a variety of styles, qualities, and sizes of crimps. Crimps are used to secure beading wire at the start and ends of the design. Can also be used at any point along the design to keep elements of the design in their place. Tip: be sure to have a pair of crimp pliers or flat nose plier handy!
