

## Change is Good!

You may have noticed that changes are afoot here at Glacier Peak Holistics. Over the past few months, we've been revising our packaging and labeling, and we aren't done yet. Rest assured none of our awesome products are changing; we're just giving things a facelift, starting with our logo.

There are a few reasons for this and one of the biggest is to welcome our feline friends! Our products and services have always been suitable for cats (just no Herbal Aspirin for the kitties, please), so we wanted to highlight that with our new logo. We hope you like it as much as we do!

From this...

To this!

## Who We are...

For the past five years, Glacier Peak Holistics has been quietly growing, reaching more and more pets whose guardians are looking for holistic alternatives to pharmaceuticals or expensive allergy tests and who want to find the best solutions for common issues like joint discomfort, itching, scratching and depleted immune systems. While our goal is to grow to help every pet who needs us, we take great pride in being a small, woman-owned business that provides exceptional, personalized customer service. When you call or write to us, you get one-on-one attention from someone who genuinely cares about your pet and who shares your desire to help give them the best care.

All of our products are created, blended, and packaged right here in our warehouse in one of the most beautiful places on earth. The mountains, lakes, and big sky that surround us reflect the essence of our products – pure, natural and organic.

## New Labels...

In the next few months, we will be introducing our new packaging. We've already redesigned the look of our Alternative Sensitivity Assessment, now known as the [Healthy Dog & Cat Alternative Sensitivity Assessment](#). Your cat can benefit from this service just as much as your dog.

Look for the new packaging on our website and at your favorite local pet care retailer.

No, we don't have elk as clients, but we do have them as neighbors! We thought you'd enjoy this great shot our sales rep, Traci, captured just the other evening on her way to town.

## Next Month...

- Ask Deb: What are enzymes and probiotics and why do my pets need them?
- Featured product: Peak Immune
- Interpreting the results of your Alternative Sensitivity Assessment
- Meet the GPH staff and their pets
