Volume III, Issue III ~ March 2016

Making Miracles Happen... Naturally!

Message from the Pack Leader:

A sure sign of spring in Montana is the return of Robins. I saw a flock of them on the first day of the month. I have to tell you, this is a rare event. As much as I love spring, these little guys are in for a bit more winter. March can have every known weather pattern in one 24 hour period. So I wish them luck and warmth for the coming 6 weeks.

Krieger is settling in nicely with his new family. He makes me laugh and mostly irritates Ellia with his silly antics. They play like crazy, but she is a very independent girl and quickly tires of him, so he picks on Puma the cat instead. There is never a dull moment with this crew. Even though there is no Irish in either of them, we plan on having a spectacular St. Patrick's Day and we hope you do too!

We are still looking for wonderful photos of your besty. Please feel free to send them in. We won't use it until we consult with you first, but it would be so fun to have our very own 4 footed customers on our site, telling the world how good they feel.

March 23rd is National Puppy Day, how old is your "puppy"? To me they are always puppies and the love grows with age. March 6th – the 12th is National Pet Sitters week. I know mine are worth their weight in gold. They are always there when I have to be somewhere else. So, a huge thank you to all you wonderful pet sitters out there.

The first day of spring is on March 20, which on the GPH calender is the perfect time to give your fur-iends an immune boost with [Peak Immune](#). This is our 4 times per year (season change) super charged immune system super charger. All forms and sizes are on sale this month.

We hope you have a lovely March,

~Happy Tails~

Deb, Ellia and Krieger the wonder dog.... Wondering what on earth he'll do next.

We are so thrilled for Jeanne and Ziva! ~ The GPH Pack

Subject: WON'T GO WITHOUT INFLAPOTION!

My beloved 6-yr. old black lab, having soft tissue injuries to all 4 legs, was moving so poorly and in continual pain. I actually had brought home a baby bike trailer in anticipation of having to tow her around when she couldn't walk anymore. Then, through the dog community, I heard about the great reputation of Inflapotion. At that point, I was ready to try anything, and quickly ordered.

What a miracle! Within hours of the first dose, Ziva was obviously energized, moving better and feeling less pain. Unable to accept what was so clearly evident, I skipped a dose. When I saw the return of the pain in my girl's eyes and watched her again moving slowly, I was totally convinced. Soon she was back to walking and moving fairly fluidly, and can now even run for short distances. Now almost a year later, she has received Inflapotion at every meal. We'll NEVER go without... the quality of my pet's life depends on it! I just wish I could find such a wonderful product for my aging, ailing self!

Thank you, Glacier Peak Holistics!

Jeanne Gonzalez
