Volume III, Issue V ~ May 2016

Making Miracles Happen... Naturally!

Message from the Pack Leader:

Happy May and Happy Mother's Day to all our wonderful pet parents around the world. I think in Montana we skipped spring all together and went right into summer. We have had 80 degree days already. Already too hot to leave dogs in the car, so please use caution when taking your pet with you at this time of year.

This month we are introducing a new product.... Drum roll please.... [Inflapotion Oil](#)! It will be available in a 2oz pump bottle with attached .35 oz roll on, as well as a [4 oz refill](#) size. This is an external oil designed to be used on sore joints and muscles. And... you can use it on you too! We have received so many wonderful reports from our test group. (Mostly people). We are very excited to bring it to you.

Traci Marvel and I went to the Sundance resort in Utah recently to scope out places for our upcoming training seminars. What a magical place to teach about the magic of herbs and what we do. Stay tuned as this develops...

This month brings many days of information and education for all of us. It is National Service Dog Eye Examination Month. The first week of May is National Be Kind to Animals week. What the heck... everyday should be! May 14th is National Animal Disaster Preparedness Day and May 15 – 21 is National Dog Bite Prevention Week. So, all this and so much more. Get informed and let's help the animals of the world to have a better quality of life.

We have some wonderful Spotlight Stories and Testimonials this month, along with [Daily Defense](#) on special for the month at 25% off all sizes.

Please enjoy this edition of the Glacier Peak Holistics Newsletter and as always, if you have comments or thoughts please feel free to share them with us.

As always, thank you for being part of our pack!

~Happy Tails~

Tawnya Rieben from Montana

I started using [Inflapotion](#) and [Daily Defense](#) about 2 months ago, for both my cats and dog. My dog, Preston, is a 9 year old Chihuahua, who has struggled off and on with a herniated disc in his back since he was 4. I started Preston on Inflapotion, knowing it was probably good for him, but not actually expecting to physically notice a difference. However, within a month of him taking Inflapotion, I noticed his stance seemed perkier/spunkier, and I instantly realized he stood and walked more like when he was 4-5 years old! Was definitely pleasantly surprised and impressed!! Love Inflapotion!

Also, I gave some samples of Inflapotion to the physician I work for, who has a 4 year old Airedale, with bad arthritis in her knee, and can no longer jog with him. He was definitely skeptical and I didn't actually think he'd try it out. However, today (after a week on Inflapotion), he had to bolt from work, because his dog (and other two dogs) were off on an adventure about a mile from his house. He said typically the Airedale with the bad knee would barely leave the front deck, but now, after Inflapotion, she's the ring leader, taking the other two dogs on adventures, causing raucous. :) ha-ha!

Lastly, all 3 of my furballs get Daily Defense, as well. I have a 7mo old kitten, Oakley, who had acne on her chin. I was told to change her food; however, doing so did not clear up the acne. After a couple weeks on Daily Defense, I noticed her acne cleared up, and has not returned!

I cannot say enough great things about the products - would definitely recommend them!

Also, I've attached a couple pics of the furballs - one of them includes the acne on Oakley's chin. The other orange Kitty in the pictures is my big boy Tater Tot. :)

Thanks again,
Tawnya Rieben

Product Spotlight

Air Fantastic WashYourAir™ Technology

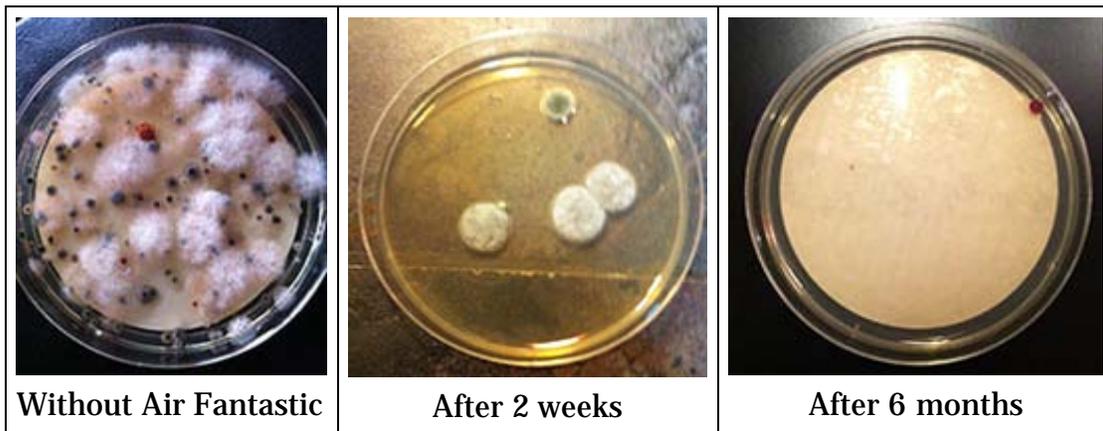

[Air Fantastic](#) manufactures a variety of different machines which provide continuous sanitizing WashYourAir™ cleansing ions that wash your air. WashYourAir™ continuously emits a dry version of the liquid Hydrogen Peroxide at a safe level. Hydrogen Peroxide was used to decontaminate Ebola infected areas. This WashYourAir™ technology uses a catalytic process to derive ions from the moisture in the air. These ions neutralize odors, sanitize the air, and create a healthy living environment at the same time. This cleaning process is similar to the one we find in nature where unpleasant odors, such as road kill,

garbage, and skunk spray are eliminated through oxidation.

Test results from the West Texas A&M University prove that this process is safe and effective in reducing dangerous airborne and surface bacteria, including Staphylococcus Aureus (Staph bacteria) and the drug resistant MRSA bacteria. The tests also prove that this technology has successfully reduced airborne contaminants such as mold, fungus and bacteria up to 99% within 72 hours. In addition, a customer performed an independent test and proved that this technology could reduce 80% of surface bacteria in just one hour. Since the bacteria are reduced through an oxidation process and not an anti-bacterial solution, this technology reduces the possibility for germs to become immune to anti-bacterial agents through mutation.

Most allergy symptoms are a result of people breathing in airborne pollen or dust. If the exposure to airborne pollen or dust is minimized, people's allergy symptoms will gradually reduce. Heavy and large airborne particulate contaminants such as dust, pollen, allergen and dander can remain airborne indefinitely at certain levels due to positive static energy that repels the particulate from the ground, which is also positive. Airborne particulate contaminants can easily be observed when sunlight shines through the window in the morning.

This technology produces negatively charged ions that can make these airborne particulates settle down on the floor. Lab results from the West Texas A&M University proved that up to 99% of particulates were reduced in 72 hours.

Green Technology

WashYourAir™ Technology sanitizes and deodorizes your environment without using chemicals, anti-bacteria agents, synthetic deodorizers or enzymes. In addition, all of our machines are energy green friendly and require very little electricity (~15W).

We are thrilled to be able to offer this "fantastic" product to our customers as we believe it can significantly improve the health of everyone in your household! Click [here](#) for more information.

Customer Testimonial:

Dog with Severe Allergies & Bleeding Sores

I would like to give my sincere thanks for helping my dog, Molly, with her skin problems. Three months ago we were at the vet every other week trying different medications for a severe skin irritation. I had not changed any cleaning supplies in my home nor were there any changes in the household environment that I could come up with. The vet put Molly on Prednisone, a cortisone medication taken orally. After two weeks on the medication the whole right side of Molly's body was bloody and raw. The vet said it could be fungus in the air or something else in the air in my home. Within three days of plugging in your air purification unit, Molly's right side scabbed up and started healing. It has now been three months and Molly's has grown her fur back and is symptom free. I feel our home is now safe for both dogs and myself.

Thank you for your help.

S. Smith, Tucson, AZ
