Why Paper?

Single use plastic straws are one of the most common items that make their way into the environment. All plastic straws, including biodegradable and compostable plastic straws, pose a serious threat to the marine environment as their fragments do not breakdown in the ocean so they are able to be ingested by marine organisms. This is why paper is the best option. Our paper straws will start breaking apart after 3 days in water, making them safer for wildlife than plastic.

So far New Zealand businesses have saved over **1,700,000** single use plastic straws from landfill or the ocean by switching to paper

How to Make the Change

The Rubbish Whisperer advocates '**Straws On Request**'. By only offering paper straws as customers request them, you will reduce straw consumption by up to 70%, counteracting the higher cost of paper straws. This allows your business to benefit from going green without reducing profits.

Plastic straws stay on the planet for 200 years

Plastic straws are among the top 10 marine debris items

44% of all seabirds & mammals have ingested plastic

It is estimated by 2050 there will be more plastic in the ocean than fish

200 million plastic straws are used in NZ every year

90% of rubbish in the oceans is comprised of plastic

Why The Rubbish Whisperer?

Our straws last 20 times longer than Chinese made paper straws*

Our straws are durable as they have 30% more material than other brands

The ink on our straws doesn't leach into your drink*

Our straws are Foodsafe

Our straws are home compostable, breaking down in 45-60 days

Unlike plastic and PLA, our straws break apart in water in 3 days. While PLA is more environmentally friendly than plastic in its production, it acts like plastic in the ocean and poses a threat to marine life

We support your move to paper by providing publicity material and social media marketing to educate customers about your switch to paper straws on request

We donate 20% of profit to local conservation and environmental groups

The Rubbish Whisperer is a locally owned company that pays a living wage

*Aardvark product testing

Subscription

Place reoccurring order either for the entire year or just your busiest months.

By setting up a subscription you:

Receive discounted price

Receive discounted shipping

Guarantee your choice of colours

Don't have to place orders when you are busy

Can cancel anytime

Purchasing Group

You and surrounding small businesses can form a purchasing group and place a joint order (one invoice per group). You all benefit by receiving lower prices and splitting the shipping costs.

Bulk Order

Receive a discount for orders over 8 cases. This can be either in one purchase or over a subscription period (see above).

Contact us at sales@rubbishwhisperer.co.nz to set up an account

A black medical tray is shown from a top-down perspective. On the tray, there is a white plastic straw lying diagonally. To the left of the straw is a small white plastic cup containing two capsules: one purple and green, and one yellow and green. To the right of the straw is a larger white plastic cup filled with clear water. The tray is set on a light-colored carpeted floor. A red object is partially visible in the top right corner, and a green object is partially visible in the bottom left corner.
