Note: Light feeding plants/gardens with lower light intensity/no CO2- Adjust down as much as 30%
Heavy feeding plants/high light intensity rooms/high CO2- Adjust up as much as 20%

For extended VEG cycles, please repeat week 4 of VEG table.

For extended Flower cycles, please repeat week 6 of the Flower chart for any additional weeks added, making sure to follow week 7 and 8 the final two weeks of Flower.

*PPM's calculated on base water treated with a reverse osmosis filter@ zero PPM.
